ENFORCEMENT OF CIVIL LIABILITIES

The Company is a Public Limited (Listed) Company under the laws of India and all the Directors and all Executive Officers are residents of India. It may not be possible or may be difficult for investors to affect service of process upon the Company or these other persons outside India or to enforce against them in courts in India, judgments obtained in courts outside India. India is not a party to any international treaty in relation to the automatic recognition or enforcement of foreign judgments.

However, recognition and enforcement of foreign judgments is provided for under Sections 13, 14 and 44A of the Code of Civil Procedure, 1908, as amended (the “Civil Procedure Code”). Section 44A of the Civil Procedure Code provides that where a certified copy of a decree of any superior court (within the meaning of that section) in any country or territory outside India which the Government of India has by notification declared to be a reciprocating territory, is filed before a district court in India, such decree may be executed in India as if the decree has been rendered by a district court in India. Section 44A of the Civil Procedure Code is applicable only to monetary decrees or judgments not being in the nature of amounts payable in respect of taxes or other charges of a similar nature or in respect of fines or other penalties. Section 44A of the Civil Procedure Code does not apply to arbitration awards even if such awards are enforceable as a decree or judgment. Among others, the United Kingdom, Singapore, Hong Kong and the United Arab Emirates have been declared by the Government of India to be reciprocating territories within the meaning of Section 44A of the Civil Procedure Code.

The United States has not been declared by the Government of India to be a reciprocating territory for the purposes of Section 44A of the Civil Procedure Code. Under Section 14 of the Civil Procedure Code, an Indian court shall, on production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction unless the contrary appears on the record; but such presumption may be displaced by proving want of jurisdiction.

A judgment of a court in any non-reciprocating territory, such as the United States, may be enforced in India only by a suit upon the judgment subject to Section 13 of the Civil Procedure Code, and not by proceedings in execution. Section 13 of the Civil Procedure Code, which is the statutory basis for the recognition of foreign judgments (other than arbitration awards), states that a foreign judgment shall be conclusive as to any matter directly adjudicated upon between the same parties or between parties under whom they or any of them claim litigating under the same title except where:

- The judgment has not been pronounced by a court of competent jurisdiction.
- The judgment has not been given on the merits of the case.
- The judgment appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where such law is applicable.
- The proceedings in which the judgment was obtained are opposed to natural justice.
- The judgment has been obtained by fraud; and/or
- The judgment sustains a claim founded on a breach of any law in force in India.

A suit to enforce a foreign judgment must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. In addition, it is unlikely that an Indian court would enforce foreign judgments if it considered the amount of damages awarded as excessive or inconsistent with public policy or if the judgments are in breach of or contrary to Indian law. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the Reserve Bank of India to repatriate any amount recovered pursuant to execution of such judgment. Any judgment in a foreign currency would be converted into Rupees on the date of such judgment and not on the date of payment and any such amount may be subject to income tax in accordance with applicable laws. The Company cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

As of the date of this Letter of Offer, our company has applied for various approvals amongst others, including, registration under Factories Act, 1948 for both our manufacturing units and applications for change of name of our Company post conversion from a private limited company to a public limited company. These approvals, licenses, registrations and permits are subject to several conditions and are

primarily valid for a specific period. For example, our trade license and licenses under FSS Act, 2006 are typically granted for a designated period of time and we are required to renew such licenses after such period. However, in some cases, these licenses could have been granted for shorter period as well. These licenses contain certain terms and conditions which are required to be complied with throughout the period of the license. We cannot assure you that we shall be able to obtain or renew such licenses or be able to continuously meet such conditions specified in such licenses or be able to prove compliance with such conditions to statutory authorities, which may lead to cancellation, revocation or suspension of relevant consents/permits/licenses/approvals. We cannot assure you that we shall be able to obtain such licenses or approvals on a timely manner or at all which may affect the timelines or the operations of the outlet. Further, the relevant authorities may also initiate penal actions against us, restrain our operations, impose fines/penalties or initiate legal proceedings for inability to obtain approvals in a timely manner or at all. Any such failure or delay in obtaining such consents, approvals, permits and licenses may affect our ability to continue our operations, which may in turn have an adverse effect on our business, financial condition and results of operations.

2. *Any non-compliance or delays in GST Return Filings and EPF Payments may expose us to penalties from the regulators.*

As a Company, we are required to file GST returns and make payments in respect of Employee Provident Fund with the respectively authorities. However, there are certain inadvertent delays in relation to filling of GST returns and EPF payments in the past for which the Company have paid the penalties and taken the steps to improve the internal system for payment of GST to mitigate the technical difficulties and the Company has appointed an external consultant to ensure timely payment of towards EPF. However, we cannot assure that we will not be subject to any legal proceeding or regulatory actions, including monetary penalties by statutory authorities on account of any inadvertent discrepancies in our GST filling or EPF payment in future, which may adversely affect our business, financial condition, and reputation.

3. *We do not have long term agreements with suppliers for our raw materials and an increase in the cost of or a shortfall in the availability of such raw materials could have an adverse effect on our business, results of operations and financial condition.*

Production quantity and cost of our products are dependent on our ability to source raw materials and packaging materials at acceptable prices, and maintain a stable and sufficient supply of our major raw materials. Our key raw materials include pulses, spices like chillies, coriander powder and other additives. We source our raw materials from across the country to ensure that the products we manufacture have an authentic taste without artificially disturbing the natural taste of the spices or other food products. For instance, for our chilli powder we source our chillies from the farms of Guntur, Khammam, Warangal, Raichur, Byadgi, Malakpet, Hyderabad and our 'Srivari Whole Wheat Atta' and 'Sharbati Atta' is made from wheat grains which are sourced from Sehore, Vidisha and Sironj in Madhya Pradesh. Therefore, each of our products is made from the finest natural produce which caters to the genuine taste and an assurance of authenticity. There can be no assurance that we will be able to procure all of our future raw material requirements at commercially viable prices. Furthermore, in the event that such suppliers discontinue their supply to us or if we are unable to source quality raw material from other suppliers at competitive prices, we may not be able to meet our production and sales targets. Interruption of, or a shortage in the supply of, raw material may result in our inability to operate our production facilities at optimal capacities or at all, leading to a decline in production and sales. An inability to procure sufficient quality raw material at reasonable cost, or an inability to pass on any additional cost incurred on purchase of raw materials to our customers, may adversely affect our operations and financial conditions.

4. *We depend on a few customers of our products, for a significant portion of our revenue, and any decrease in revenues or sales from any one of our key customers may adversely affect our business and results of operations.*

The percentage of Total Revenue from our top 10 customers were 70.24% and 81.57% in FY23 and FY24 respectively.

Our Company is engaged in the business of manufacturing spices and flour (chakki atta) and marketing and selling it in and around Telangana and Andhra Pradesh. Our business operations are highly dependent on our customers and the loss of any of our customers may adversely affect our sales and consequently on our business and results of operations. While we typically have long term relationships with our customers, we have not entered into long terms agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long-term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. If there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders or expand our customer base on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

5. *We conduct our business activities on a purchase order basis and therefore, have not entered into long-term agreements with our customers.*

Our Company is engaged in the business of manufacturing spices and flour (chakki atta) significantly on the basis of orders which are received from our customers. We have not entered into any formal agreements, arrangement or any other understanding with our customers and therefore, our business is dependent upon the continuous relationship with the customers and the quality of products supplied to us. Further, neither do we have any exclusive agents, dealers, distributors nor have we entered into any agreements with any of the market intermediaries for selling or marketing the products supplied to us. If there occurs any change in the market conditions, market trends, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

6. *The improper handling, processing or storage of our raw materials or products, or spoilage of and damage to such raw materials and products, or any real or perceived contamination in our products, could subject us to regulatory action, damage our reputation and have an adverse effect on our business, results of operations and financial condition.*

All the products that we manufacture are for human consumption and are subject to risks such as contamination, adulteration, and product tampering during their manufacture, transport or storage. Our raw materials and our products are required to be stored, handled, and transported at specific temperatures and under certain food safety conditions. Any shortcoming in the production or storage of our products due to negligence, human error or otherwise, may damage our products and result in non-compliance with applicable regulatory standards. Any allegation that our products contain contaminants could damage our reputation, adversely affect our sales and result in legal proceedings being initiated against us, irrespective of whether such allegations have any factual basis.

The improper handling, processing or storage of our raw materials or products, or spoilage of and damage to such raw materials and products, or any real or perceived contamination in our products, could subject us to regulatory action, damage our reputation and have an adverse effect on our business, results of operations and financial condition.

7. *Our business is dependent on our processing units for few products. The loss of or shutdown of operations of our processing units may have a material adverse effect on our business, financial condition and results of operations.*

Our spices processing unit is subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence,

labour disputes, lock-outs, earthquakes and other natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities. The occurrence of any of these risks could significantly affect our operating results. We carry out planned shutdowns for maintenance. Although we take precautions to minimize the risk of any significant operational problems at our facilities, our business, financial condition and results of operations may be adversely affected by any disruption of operations at our facilities, including due to any of the factors mentioned above.

8. *Our operations are considerably located in Telangana and Andhra Pradesh and failure to expand our operations may restrict our growth and adversely affect our business.*

Currently, we are carrying our business mainly in Telangana and Andhra Pradesh and hence our major revenues are generated from operations in these regions only. Geographical and functional expansion of our business domain requires establishment of adequate network. As we seek to diversify our regional focus, we may face the risk that our competitors may be better known in other markets, enjoy better relationships with customers. Our lack of exposure in geographical boundaries outside our operating regions could impact our future revenues, our operating results and financial conditions.

9. *Our Company has ventured into manufacturing and trading of spices in 2019 and of whole wheat flour in 2021, and therefore has a very limited operating history of our operations with respect to the same, which will make it difficult for the investors to evaluate our historical performance or future prospects.*

Our Company started its business operations in 2019 by setting up a production facility at Survey number 234/4, and 234/5, Jalpally Village, Balapur Mandal, Jalpally Municipality, Ranga Reddy District, Telangana for manufacturing turmeric powder (*haldi*), chilli powder (*mirchi*) and coriander powder (*dhaniya*). In 2021, our Company expanded its business operations by manufacturing Srivari spices, continuing with its mission to provide genuine products, diversified into madras sambar masala, chicken masala, garam masala and mutton masala in pouches, boxes and bottles. In 2021, our Company was awarded with the title of 'Best Emerging Spices Brand- 2021' by Business Mint. Further, in the year 2021, our Company expanded its business operations by setting up a new manufacturing unit at Raikal Village, Farooqnagar Mandal, Ranga Reddy District, Telangana. Lastly, in 2022 we introduced a new product category by manufacturing whole wheat flour (*chakki atta*). Since, we have a limited operating history of manufacturing spices and whole wheat flour (*chakki atta*), we may not have sufficient experience to address the risks related to the manufacturing of the said products. Due to our limited experience, we may not be able to identify the risks involved in such operations and therefore could fail to achieve timely fulfilment of our orders and the quality requirement of our products. Since we are not abreast with the market, we may not be successful in identifying our competitors or keeping up with the requirements of the customer base. We may face difficulty in understanding the demand and supply patterns, marketing segments for such products which may pose a risk in the smooth operation, and working of our proposed manufacturing unit. In the event that we fail to understand the market operations and the risks related to the same, our business, financial performance and cash flows may be affected.

10. *Our continued operations are critical to our business and any shutdown of our manufacturing units may adversely affect our business, results of operations and financial condition.*

Our manufacturing units are located in Hyderabad. As a result, any local social unrest, natural disaster or breakdown of services and utilities in these areas could have material adverse effect on the business, financial position and results of our operations. Our current manufacturing units are subject to operating risks, such as breakdown or failure of equipment, power supply or processes, reduction or stoppage of water supply, performance below expected levels of efficiency, obsolescence, natural disasters, industrial accidents and the need to comply with the directives of relevant government authorities.

In the event, we are forced to shut down our manufacturing units for a prolonged period; it would adversely affect our earnings, our other results of operations and financial condition as a whole. Spiralling cost of living around our units may push our manpower costs in the upward direction, which may reduce our margin and cost competitiveness. For instance, due to the ongoing pandemic and the lockdown imposed by the Central Government and various state governments, we may be required to shut down our

manufacturing units which may cause an adverse impact on our business operations, revenue, results of operations and financial conditions.

In addition to the above if our manufacturing units suffer losses as a result of any industrial accident, we may be forced to shut down our manufacturing units which could result in us being unable to meet with our commitments, which will have an adverse effect on our business, results of operation and financial condition. Further, any contravention of or non-compliance with the terms of various regulatory approvals applicable to our manufacturing units may also require us to cease or limit production until such non-compliance is remedied to the satisfaction of relevant regulatory authorities. We cannot assure you that we will not experience work disruptions in the future resulting from any dispute with our employees or other problems associated with our employees and the labor involved in our manufacturing units, which may hinder our regular operating activities and lead to disruptions in our operations, which could adversely affect our business, prospects, financial condition, cash flows and results of operations.

11. Any failure in our quality control processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers' expectations.

Our products may contain certain quality issues or undetected errors, due to defects in manufacture of products or raw materials which are used in the products. We have implemented quality control processes for our raw materials and finished goods on the basis of internal quality standards. However, we cannot assure you that our quality control processes or our product will pass the quality tests and inspections conducted by various agencies as per their prescribed standards will not fail. Any shortcoming in the raw materials procured by us or in the production of our products due to failure of our quality control procedures, negligence and human error or otherwise, may damage our products and result in deficient products. It is imperative for us to meet the regulatory quality standards set by regulatory agencies and our customers as deviation from the same can cause them to reject our products and can also cause damage to our reputation, market standing and brand value.

In the event the quality of our products is sub-standard or our products suffer from defects and are returned by our customers due to quality complaints, we might be compelled to take back the sub-standard products and reimburse the cost paid by our customers. Such quality lapses could strain our longstanding relationship with our customers and our reputation and brand image may suffer, which in turn may adversely affect our business, results of operations and financial condition. Our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which could have a severe impact on our revenue and business operations. We also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. We cannot assure you that we will not experience any material product liability losses in the future or that we will not incur significant costs to defend any such claims. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

12. Any adverse change in regulations governing our products and the products of our customers, may adversely impact our business prospects and results of operations.

Regulatory requirements with respect to our products and the products of our customers are subject to change. An adverse change in the regulations governing the development of our products and their usage by our customers, including the development of licensing requirements and technical standards and specifications or the imposition of onerous requirements, may have an adverse impact on our operations. Our Company may be required to alter our manufacturing and/or distribution process and target markets and incur capital expenditure to achieve compliance with such new regulatory requirements applicable to us and our customers.

We cannot assure you that we will be able to comply with the regulatory requirements. If we fail to comply with new statutory or regulatory requirements, there could be a delay in the submission or grant of approval for manufacturing and marketing new products or we may be required to withdraw existing products from the market. Moreover, if we fail to comply with the various conditions attached to such approvals, licenses, registrations and permissions once received, the relevant regulatory body may suspend, curtail or revoke our ability to market such products and/or we may be deemed to be in breach of our arrangements with our customers. Consequently, there is an inherent risk that we may inadvertently fail to

comply with such regulations, which could lead to forced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our new products, which may adversely impact our business, results of operations and financial condition.

13. Our inability to expand or effectively manage our sales and marketing network may have an adverse effect on our business, results of operations and financial condition.

The efficiency of the marketing and sales network is critical to the success of our Company. Our success lies in the strength of our relationship with our customers who have been associated with our Company. Our Company has a unique business model, wherein we market and sell our products directly to our customers, without involving any major intermediaries, which helps us provide complete revenue share to the farmers and provide cost competitive and affordable products to our customers. We manufacture unadulterated products and do not add any preservatives in our products. We sustain our products by manufacturing and packaging products in quantities which are proportionate to the shelf life of our product, in order to avoid wastage and deliver a wide range of products which carry the freshness and goodness of each ingredient. Our business has two model first is direct to customer (“D2C”) in nature, wherein we deliver our products directly at the doorstep of our customers using approximately 15,000 retail stores. Secondly, we also work in business to business (“B2B”), wherein we deliver our products to the suppliers directly for sell to their consumers. Therefore, once the product is consumed by our customers, they place an order for the product and this helps us maintain a cyclic and continuous relationship with our customers. We do not have a distribution or a third-party marketing network, therefore we are highly dependent upon our internal sales and marketing teams.

We continuously seek to increase the penetration of our products with the continuous efforts of our sales and marketing teams by targeting different customer groups. We cannot assure you that we will be able to successfully deploy the efforts of our sales and marketing teams or effectively manage our existing network. If the terms offered to our sales and marketing executives by our competitors are more favourable than those offered by us, our sales and marketing executives may decline to distribute our products and terminate their arrangements with us. We may be unable to appoint replacement of our sales and marketing executives in a timely fashion, or at all, which may reduce our sales volumes and adversely affect our business, results of operations and financial condition.

14. Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company’s profits, thereby affecting our operation and financial condition.

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business network model, we supply our products directly to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company’s results of operations and financial condition.

There is no guarantee on the timeliness of all or any part of our customers’ payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

15. Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.

Our business requires a significant amount of working capital. As per our settled business terms, we require our customers to pay the full amount of the consideration only after they receive the order, as a result, significant amounts of our working capital are often required to finance the purchase of raw material and execution of manufacturing processes before payment is received from our customers. Further, we are also required to meet the increasing demand and for achieving the same, adequate stocks have to be maintained which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing such increased demand of our products, we might not be able to

efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims.

All of these factors may result, in increase in the amount of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

- 16. We are dependent on information technology systems in carrying out our business activities and it forms an integral part of our business. Further, if we are unable to adapt to technological changes and successfully implement new technologies or if we face failure of our information technology systems, we may not be able to compete effectively which may result in higher costs and would adversely affect our business and results of operations.***

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations. Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorised access to our networks. In the event, any breach of our systems or software leads to the leaking of our trade secrets or any inventive techniques devised by our Company, it might lead to loss of our originality in the market and increase the chance of our products being substituted by the products of our competitors.

Our future success depends in part of our ability to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis. Our failure to successfully adopt such technologies in a cost-effective manner could increase our costs thereby compelling us to bid at lower margins which might lead to loss of bidding opportunities vis-à-vis such competitors. Additionally, the government authorities may require adherence with certain technologies and we cannot assure you that we would be able to implement such technologies in a timely manner or at all. The cost of upgrading or implementing new technologies or upgrading our existing equipment or expanding our capacity could be significant, less cost effective and therefore could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

- 17. Relevant copies of educational qualifications of our Promoters, Directors and Senior Management are not traceable.***

Relevant copies of the educational qualifications of our Promoters, Directors and Senior Management. are not traceable. The information included in the section are based on the affidavits obtained from the Promoters, Directors and Senior Management. Consequently, we or the Book Running Lead Manager cannot assure you that such information in relation to the particular Promoters are true and correct and you should not place undue reliance on the experience and qualification of our management included in this Letter of Offer.

18. We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.

Our Company seeks to grow its market reach domestically to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the advancement of research and development in the food and spices industry, changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company may not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any international expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

19. We are dependent on third party transportation providers for delivery of raw materials to us from our suppliers and delivery of our products to our customers. We have not entered into any formal contracts with our transport providers and any failure on part of such service providers to meet their obligations could adversely affect our business, financial condition and results of operation.

To ensure smooth functioning of our manufacturing operations, we need to maintain continuous supply and transportation of the raw materials required from the supplier to our manufacturing units and transportation of our products from our units to our customers, which may be subject to various uncertainties and risks. We are significantly dependent on third party transportation providers for the delivery of raw materials to us and delivery of our products to our customers. Uncertainties and risks such as transportation strikes or delay in supply of raw materials and products could have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to maintain a continuous supply of raw materials or to deliver our products to our distribution intermediaries in a timely, efficient and reliable manner could adversely affect our business, results of operations and financial condition.

Further, we have not entered into any long-term agreements with our transporters for our manufacturing units and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfill their obligations or would not commit a breach of the understanding with us. In the event that the finished goods or raw materials suffer damage or are lost during transit, we may not be able to prosecute the agencies due to lack of formal agreements. Further, the transport agencies are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which could adversely affect our business, results of operations and financial condition.

20. Our Company has experienced negative cash flow in the past and may continue to do so in the future,

which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.

Our Company has experienced negative net cash flow in operating and investing activities in the past, the details of which are provided below:

(₹ in lacs)

Particulars	March 31, 2024
Net Cash Flow from/(used in) Operating Activities	(1,055.68)
Net cash generated from/(used in) investing activities	(178.84)

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

21. *Our Company has availed certain unsecured loans which may be recalled at any time.*

Our Company has availed certain unsecured loans of which an amount of ₹ 454.31 lakhs is outstanding for the Financial Year ended March 31, 2024, which may be recalled at any time. In the event, any of such unsecured lenders seek a repayment of any these loans, our Company would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to arrange for any such financing arrangements, we may not have adequate working capital to undertake new projects or complete our ongoing projects. Therefore, any such demand may adversely affect our business, financial condition and results of operations.

22. *Our inability to manage inventory in an effective manner could affect our business.*

Our business model requires us to maintain a certain level of inventory to meet the present and future orders. If we underestimate the orders that we may receive we may experience inventory shortages and a loss of opportunity. Similarly, an over estimation of orders may result in over stocking leading to increased holding costs. Additionally, any over run in holding of such goods may lead to their decay. Therefore, any mismanagement on our part to determine the optimum inventory levels may impact our operations and cause us to incur losses.

23. *If our Company is unable to protect its intellectual property, or if our Company infringes on the intellectual property rights of others, our business may be adversely affected. In the event, any actions of our Company qualifies as a breach of any of the clauses of this deed, it could have a material impact on our goodwill, business operations, financial condition and results of operations.*

Our Company has created a brand presence with our brand-name “*Srivari*”. Our Company’s success largely depends on our brand name and brand image, therefore we have trademarked our brand logo differentiating our Company’s products from that of our competitors. Our current logo has been registered under the Trademarks Act, 1999. The details of the trademarks can be seen in the chapters titled, “***Our Business- ‘Intellectual Property Rights’***” and “***Government and other Statutory Approvals- ‘Intellectual Property Related Approvals’***” on pages 82 and 116 of this Letter of Offer.

We believe that there may be other companies or vendors which operate in the unorganized segment using our trade name or brand names. Any such activities may harm the reputation of our brand and sales of our products, which could in turn adversely affect our financial performance. We rely on protections available under Indian law, which may not be adequate to prevent unauthorized use of our intellectual property by third parties. Furthermore, the application of laws governing intellectual property rights in India is uncertain and evolving, and could involve substantial risks to us. Notwithstanding the precautions we take to protect our intellectual property rights, it is possible that third parties may copy or otherwise infringe on our rights, which may have an adverse effect on our business, results of operations, cash flows and financial condition. We may need to litigate third parties in order to prevent them from misusing our trademarks or brand names and any such litigation could be time consuming and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to

enforce or protect its intellectual property, which could adversely affect our business, results of operations and financial condition.

- 24. *We have significant power requirements for continuous running of our manufacturing units. Any disruption to our operations on account of interruption in power supply or any irregular or significant hike in power tariffs may have an effect on our business, results of operations and financial condition.***

Our manufacturing unit's significant electricity requirements and any interruption in the supply of power may temporarily disrupt our operations. Since, we have a high-power consumption, any unexpected or unforeseen increase in the tariff rates can increase the operating cost of our manufacturing units and thereby cause an increase in the production cost which we may not be able to pass on to our customers. There are limited number of electricity providers in the areas from where we operate due to which in case of a price hike, we may not be able to find a cost-effective substitute, which may negatively affect our business, financial condition, cash flows and results of operations. For further details, please refer to the chapter titled "***Our Business***" on page 82 of this Letter of Offer.

- 25. *We operate in a competitive business environment and our inability to compete effectively may adversely affect our business, results of operations, financial condition and cash flows.***

The food and spices industry in India is competitive with both organized and unorganized markets. However, we are required to compete both in the domestic and international markets. We may be unable to compete with the prices and products offered by our competitors. We may have to compete with new players in India and abroad who enter the market and are able to offer competing products. Our competitors may have access to greater financial, manufacturing, research and development, marketing, distribution and other resources and more experience in obtaining the relevant regulatory approvals. Increasing competition may result in pricing pressures and decreasing profit margins or loss of market share or failure to improve our market position, any of which could substantially harm our business and results of operations. We cannot assure you that we will be able to compete with our existing as well as future competitors as well as the products prices and payment terms offered by them. In addition, our customers may enter into contract manufacturing arrangements with third parties, for products that they are presently purchasing from us. Our failure to successfully face existing and future competitors may have an adverse impact on our business, growth and development.

Further, some of our competitors may be larger than we are or develop alliances to compete against us and may have greater resources, market presence and geographic reach and have products with better brand recognition than ours. Some of our competitors may be able to procure raw materials at lower costs than us, and consequently be able to sell their products at lower prices. As a result, our competitors may be able to withstand industry downturns better than us or provide customers with products at more competitive prices. Some of our international competitors may be able to capitalize on their overseas experience to compete in the Indian market. Consequently, we cannot assure you that we will be able to compete successfully in the future against our existing or potential competitors or that our business and results of operations will not be adversely affected by increased competition. We cannot assure you that we will be able to maintain our existing market share. Our competitors may significantly increase their marketing expenses to promote their brands and products, which may require us to similarly increase our advertising and marketing expenses and engage in effective pricing strategies, which we may not be able to pass on to our customers which in turn may have an adverse effect on our business, results of operations and financial condition. For further details, please see "***Industry Overview***" on page 69 **Error! Bookmark not defined.** of this Letter of Offer.

- 26. *Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.***

Our Promoters, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Director and Key Managerial Personnel may also be interested to the extent of

any transaction entered into by our Company with any other company or firm in which they are directors or partners.

There can be no assurance that our Promoters, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

27. Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.

Upon completion of this Issue, our Promoters and members of our Promoter Group will collectively hold 69.94 % of the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders' approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company's best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

28. The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.

Our Promoters' average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined on a fixed price basis. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled "**Capital Structure**" on page 48 of this Letter of Offer.

29. Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

30. We have in past entered into related party transactions and we may continue to do so in the future.

As of March 31, 2024, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled — "**Financial Information**" at page 102.

While we believe that all our related party transactions have been conducted on an arm's length basis, and we confirm that the related party transactions entered into by the company are in compliance with the relevant provisions of Companies Act and other applicable laws, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

31. *Our Promoter has extended personal guarantees with respect to various loan facilities availed by our Company. Revocation of any or all of these personal guarantees may adversely affect our business operations and financial condition.*

Our Promoter has extended certain personal guarantees in favour of certain banks / financial institutions with respect to various facilities availed by our Company from them. In the event any of these guarantees are revoked, our lenders may require us to furnish alternate guarantees or may demand a repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative guarantees in a timely manner or at all. Further, if our lenders enforce any of the restrictive covenants or exercise their options under the relevant debt financing arrangement, our operations and use of assets may be significantly hampered and lenders may demand the payment of the entire outstanding amount and this in turn may also affect our further borrowing abilities thereby adversely affecting our business and operations.

32. *Our agreements with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.*

We have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund-based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying unsecured loans from third parties, undertake guarantee obligations on behalf of any other borrower, which require our Company to obtain prior approval of the lenders for any of the above activities. We cannot assure you that our lenders will provide us with these approvals in the future.

Further, some of our financing arrangements include covenants to maintain our total outside liabilities and total net worth up to a certain limit and certain other liquidity ratios. We cannot assure prospective investors that such covenants will not hinder our business development and growth in the future. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. Defaults under one or more of our Company's financing agreements may limit our flexibility in operating our business, which could have an adverse effect on our cash flows, business, results of operations and financial condition.

It may be possible for a lender to assert that we have not complied with all applicable terms under our existing financing documents. Further we cannot assure that we will have adequate funds at all times to repay these credit facilities and may also be subject to demands for the payment of penal interest.

33. *Stringent food safety, consumer goods, health and safety laws and regulations may result in increased liabilities and increased capital expenditures.*

Our operations are subject to stringent health and safety laws as our products are for human consumption and are therefore subject to various industry specific regulations. We may also be subject to additional regulatory requirements due to changes in governmental policies. Further, we may also incur additional

costs and liabilities related to compliance with these laws and regulations that are an inherent part of our business. We are subject to various central, state and local food safety, consumer goods, health and safety and other laws and regulations. These laws and regulations are increasingly becoming stringent and may in the future create substantial compliance or remediation liabilities and costs. These laws may impose liability for non-compliance, regardless of fault. Other laws may require us to investigate and remediate contamination at our facilities and production processes. While we intend to comply with applicable regulatory requirements, it is possible that such compliance may prove restrictive, costly and onerous and an inability to comply with such regulatory requirement may attract penalty. For details see, “**Government and Other Approvals**” beginning on page 116.

34. *In addition to our existing indebtedness for our existing operations, we may incur further indebtedness during the course of business. We cannot assure that we would be able to service our existing and/ or additional indebtedness.*

For the Financial Year ended on March 31, 2024 our Company’s total outstanding secured loans are ₹ 254.56 lacs. In addition to the indebtedness for our existing operations, we may incur further indebtedness during the course of our business. We cannot assure you that we will be able to obtain further loans at favourable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations.

35. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this issue or any shortfall in the issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “**Objects of the Issue**” beginning on page 50 of this Letter of Offer.

36. *Our success largely depends upon the knowledge and experience of our Promoters, Directors, and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.*

The growth and success of our Company’s future significantly depends upon the experience of our Promoters and continued services and the management skills of our Key Managerial Personnel and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will

be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — **“Our Management”** on page 98 of this Letter of Offer.

- 37. *Our Registered Office, our Corporate Office and one of our manufacturing units are located on premises which is not owned by us and has been obtained on lease basis. Disruption of our rights as licensee/ lessee or termination of the agreements with our licensors/ lessors would adversely impact our manufacturing operations and, consequently, our business, financial condition and results of operations.***

As on the date of this Letter of Offer, our Registered Office, our Corporate Office and one of our manufacturing units are located on properties taken on lease basis from various lessors. There can be no assurance that our Company will be able to successfully renew the said lease agreements in a timely manner or at all or on terms favourable to us. Further, there can be no assurance that we will not face any disruption of our rights as a lessee and that such lease agreements will not be terminated prematurely by the lessor. Any such non-renewal or early termination or any disruption of our rights as lessee will adversely affect our business, financial conditions and results of operations. For further details, see **“Our Business - Properties”** on page 82.

- 38. *Any defect in title/ ownership of owner (s) (including the Promoters/ Promoter Group), from whom the Company has bought space/ taken space on lease, may adversely affect the operations of the Company resulting in loss of business.***

With a view to expand the Company’s business, the Company has acquired/ taken on leave and license basis various properties and entered into various contractual agreements with third parties. Any defect in the title/ ownership of such third parties with whom the Company has entered into such agreements may adversely affect the operations of the Company resulting in loss of business.

- 39. *Land on which our Registered Office, our Corporate Office and one of our manufacturing units is located are not owned by us. In the event, we are unable to renew the rent/leave and license agreements, or if such agreements are terminated, we may suffer a disruption in our operations.***

Our Company does not own the land on which our Registered Office, our Corporate Office and one of our manufacturing units are located. The land has been taken on lease from one of our Promoters, Neihaa Rathi and other third parties. If we do not comply with certain conditions of the lease, it may lead to termination of the lease which would have an adverse effect on our operations and there can be no assurance that renewal of lease agreement will be entered into. In the event of non-renewal of lease, we may be required to shift our manufacturing facility to a new location and there can be no assurance that the arrangement our Company enter into in respect of new premises would be on such terms and conditions as the present one. For details on properties taken on lease by us please refer to the Section titled **“Our Business”** beginning on page 82 of this Letter of Offer.

- 40. *If we are unable to maintain and enhance our brand and reputation, the sales of our products may suffer which would have a material adverse effect on our business operations.***

Our business depends significantly on the strength of our brand and reputation in marketing and selling our products. We also believe that maintaining and enhancing the “Srivari” brand, is critical to maintaining and expanding our customer base. We believe that continuing to develop awareness of our brand, through focused and consistent branding and marketing initiatives is important for our ability to increase our sales volumes and our revenues, grow our existing market share and expand into new markets. Consequently, product defects, consumer complaints, or negative publicity or media reports involving us, or any of our products could harm our brand and reputation and may dilute the impact of our branding and marketing initiatives and adversely affect our business and prospects. In addition, adverse publicity about any

regulatory or legal action against us could damage our reputation and brand image, undermine our consumers' confidence in us and reduce long-term demand for our products, even if the regulatory or legal action is unfounded or immaterial to our operations.

41. Information relating to the historical capacity of our production facilities included in this Letter of Offer is based on various assumptions and estimates and future production and capacity may vary.

Information relating to the historical capacity of our production facilities included in this Letter of Offer is based on various assumptions including those relating to availability of raw materials and operational efficiencies. Actual production levels and rates may differ significantly from the production capacities. Undue reliance should therefore not be placed on our historical capacity information for our existing facilities included in this Letter of Offer.

42. The requirement of funds in relation to the objects of the Issue has not been appraised.

We intend to use the proceeds of the Issue for the purposes described in the section titled “*Objects of the Issue*” on page 50. The objects of the Issue have not been appraised by any bank or financial institution. These are based on management estimates and current conditions and are subject to changes in external circumstances or costs, or in other financial condition, business or strategy. Based on the competitive nature of the industry, we may have to revise our management estimates from time to time and consequently our funding requirements may also change. The deployment of the funds towards the objects of the issue is entirely at the discretion of the Board of Directors/Management and is not subject to monitoring by external independent agency. However, the deployment of funds is subject to monitoring by our Audit Committee. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

43. Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates and have not been independently appraised, and may be subject to change based on various factors, some of which are beyond our control

Our funding requirements and deployment of the Net Proceeds are based on internal management estimates based on current market conditions, and have not been appraised by any bank or financial institution or other independent agency. Furthermore, in the absence of such independent appraisal, our funding requirements may be subject to change based on various factors which are beyond our control. For further details, please see the section titled “*Objects of the Issue*” beginning on page 50 of this Letter of Offer.

44. Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as breakdown, malfunctions, sub-standard performance or failures of manufacturing equipment, fire, riots, third party liability claims, loss-in-transit for our products, accidents and natural disasters. Presently, we maintain insurance cover for insuring our plant and machinery situated at our manufacturing units against loss or damage by fire, earthquake, terrorism, spoilage, impact damage due to road or rail services, etc. There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our results of operations and financial position.

45. Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future also.

46. Increased losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on us.

Our business and the industry in which we operate are vulnerable to the problem of pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. An increase in product losses due to such factors at our place of operation may require us to install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We cannot assure you whether these measures will successfully prevent such losses. Further, there are inherent risks in cash management as part of our operations, which include theft and robbery, employee fraud and the risks involved in transferring cash to banks. Additionally, in case of losses due to theft, financial misappropriation, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

47. We have not independently verified certain data in this Letter of Offer.

We have not independently verified data from the Industry and related data contained in this Letter of Offer. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

48. The requirements of being a listed company may strain our resources.

We are not a listed Company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges and compliances of SEBI (LODR) Regulations which will require us to file audited annual and unaudited half yearly results and limited review reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies which may adversely affect the financial position of the Company.

As a listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures, internal control over financial reporting and additional compliance requirements under the Companies Act, 2013. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, financial condition and results of operations. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge and we cannot assure you that we will be able to do so in a timely manner.

49. The Equity Shares have never been publicly traded and the Issue may not result in an active or liquid

market for the Equity Shares.

Prior to the Issue, there has been no public market for the Equity Shares, and an active trading market on the Stock Exchanges may not develop or be sustained after the Issue. Listing and quotation does not guarantee that a market for the Equity Shares will develop, or if developed, the liquidity of such market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

The Issue Price of the Equity Shares is proposed to be determined through a fixed price process in accordance with the SEBI ICDR Regulations and may not be indicative of the market price of the Equity Shares at the time of commencement of trading of the Equity Shares or at any time thereafter. The market price of the Equity Shares may be subject to significant fluctuations in response to, among other factors, variations in our operating results of our Company, market conditions specific to the industry we operate in, developments relating to India, volatility in securities markets in jurisdictions other than India, variations in the growth rate of financial indicators, variations in revenue or earnings estimates by research publications, and changes in economic, legal and other regulatory factors. You may not be able to resell your Equity Shares at a price that is attractive to you.

50. There is no guarantee that the Equity Shares issued pursuant to the Issue will be listed on the SME Platform of National Stock Exchange of India Limited in a timely manner or at all.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuance of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on the SME Platform of National Stock Exchange of India Limited due to delay in submission of required documents/ completion of formalities/compliance with required laws by the issuer. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

51. There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the lead manager, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the securities markets elsewhere in the world.

52. The price of the Equity Shares may be highly volatile after the Issue.

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the our industry; adverse media reports on us or the industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

53. You will not be able to sell immediately on the Stock Exchanges any of the Equity Shares you purchase in the Issue.

The Equity Shares will be listed on the Emerge Platform of National Stock Exchange of India Limited. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed

and trading may commence. Upon receipt of final approval from the Stock Exchanges, trading in the Equity Shares is to commence within six (6) working days of the date of closure of the Issue or such other time as may be prescribed by SEBI.

We cannot assure that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time period prescribed by law. Further, there can be no assurance that the Equity Shares to be Allotted pursuant to this Issue will be listed on the Stock Exchanges in a timely manner or at all.

54. There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

55. The price of the Equity Shares may be volatile, which could result in substantial losses for investors acquiring the Equity Shares in the Issue.

The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;
- our profitability and performance;
- changes in financial analysts' estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;
- performance of our competitors and the perception in the market about investments in the real estate sector;
- adverse media reports about us or the Indian real estate sector;
- significant developments in India's economic liberalisation and deregulation policies;
- significant developments in India's fiscal and environmental regulations;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

- 56. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

- 57. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of Equity Shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

- 58. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.***

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

- 59. *The novel coronavirus (Covid-19) pandemic outbreak and steps taken to control the same have significantly impacted our business, results of operations, financial condition and cash flows and further impact will depend on future developments, which are highly uncertain.***

The rapid and diffused spread of COVID-19 and global health concerns relating to this outbreak have had a severe negative impact on all businesses, including the real estate industry in which our Company operates and from where it derives substantial revenues and profits. The COVID-19 pandemic could continue to have an impact that may worsen for an unknown period of time. In view of the onslaught of the second wave of the virus and the likelihood of a third wave, this pandemic may continue to cause unprecedented economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe.

Further if in case due to any third or consequent wave of Coronavirus or surge in new and deadly variants of the Virus, if another lockdown is imposed in the country and further restrictions are imposed by the government, we may face huge losses and our business operations could be severely impacted. Any such restrictions could cause delays in the completion of our Projects and commitments made to clients, or cause damage to the goods in transit. Any of these consequences may result in loss of business and/or claims for compensation from our clients, which may have an adverse effect on our results of operations and financial condition.

- 60. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.***

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are

unable to suitably respond to and comply with any such changes in applicable law and policy. For example, the Government of India implemented a comprehensive national goods and services tax (“GST”) regime with effect from July 1, 2017, that combined multiple taxes and levies by the Central and State Governments into a unified tax structure. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from the amendment of GST or any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations relating to GST. The Government has enacted the GAAR which have come into effect from April 1, 2017.

The Government of India has announced the union budget for Fiscal 2021 and the Ministry of Finance has notified the Finance Act, 2021 (“Finance Act”) on March 28, 2021, pursuant to assent received from the President, and the Finance Act will come into operation with effect from July 1, 2020. There is no certainty on the impact that the Finance Act may have on our business and operations or on the industry in which we operate. We cannot predict whether any amendments made pursuant to the Finance Act would have a material adverse effect on our business, financial condition and results of operations. Unfavorable changes in or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals. For instance, the Supreme Court of India has, in a decision clarified the components of basic wages, which need to be considered by companies while making provident fund payments. Our Company has not made relevant provisions for the same, as on date. Any such decisions in future or any further changes in interpretation of laws may have an impact on our results of operations. Further, a of the Personal Data Protection Bill, 2019 (“Bill”) has been introduced before the Lok Sabha on December 11, 2019, which is currently being referred to a joint parliamentary committee by the Parliament. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

61. Foreign investors are subject to foreign investment restrictions under Indian law.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure you that any required approval from the RBI or any other Government agency can be obtained on any particular terms or at all.

62. Any downgrading of India’s debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India’s credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

63. The ability of Indian companies to raise foreign capital may be constrained by Indian law.

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

64. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

65. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance of our business. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence and spending. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

66. The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy; disrupt the transportation of goods and supplies, and costs of doing business in India. These problems could interrupt our Company's business operations, which could have an adverse effect on its results of operations and financial condition.

67. Natural calamities could have a negative impact on the Indian economy and cause our business to suffer.

India has experienced natural calamities such as earthquakes, tsunamis, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

68. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will

trade as well as the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares

Our Company intends to deploy Net Proceeds aggregating up to Rs. 864.02 Lakhs towards Capital expenditure, which includes purchase of machineries for manufacturing of products relating to oil manufacturing by Company, details of Machineries are as follows:

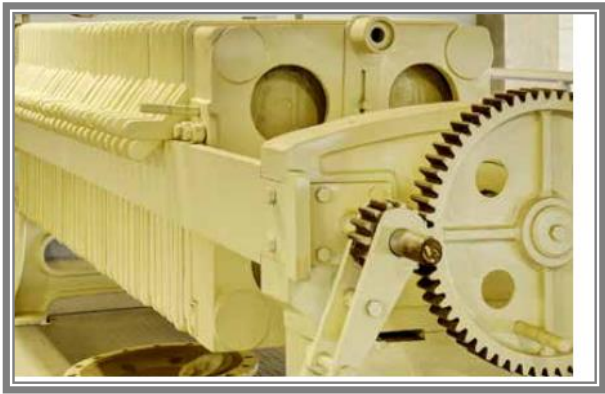

I. INSTALATION OF PLANT FOR MANUFACTURE OF OIL:-

A. Cleaning & Granding, Filtered and Oil Expeller and Steam Boiler

Our company intends to utilise ₹ 259.59 lakhs towards installation of machineries for Cleaning, Granding, Filtered, Oil Expeller and Steam Boiler at No 6-50/1, Serial Number 365/A, Raikal Village, G.P. Farooqnagar Mandal, Ranga Reddy District – 509 202.

Details of machineries for Cleaning, Granding, Filtered and Oil Expeller as below:

<p>CLEANING & GRADING SECTION</p>	<ul style="list-style-type: none"> • Cleaning is the first step in the process, and it involves the removal of foreign objects such as leaves, nodes, and weed seeds that can contaminate the oil. • Dehulling is the next step, and it entails removing the outer shell of the peanut to increase the yield of oil, improve processing efficiency, and reduce equipment wear and tear. • Cooking is a crucial step in the groundnut oil manufacturing process as it helps to break the cell walls and open the cells containing the oil. This step also decreases the thickness of the oil, making it easier to flow out. • Oil Extraction is the next step, and it involves feeding the peanuts through a hopper into a Oil Expeller Machine, where pressure increases, generating heat and lowering the oil viscosity to increase the oil flow rate. The oil and cake are then collected at the oil outlet and pressed cake exit. • After pressing, crude peanut oil still contains impurities that need to be removed. Filtration is the final step in the process, where oil filter press machines are used to remove large and small size particulates and even water from the oil. 	
<p>OIL EXPELLER</p>	<p>Oil Expellers are designed to meet the needs of small and mid-sized mechanical extraction plants. This series includes steel cast double or triple chamber expellers with inbuilt Oil N Foots conveyor, hard faced or carbon steel hardened and tempered wear parts as well as other value-added options.</p>	

<p>FILTER PRESS</p>	<ul style="list-style-type: none"> •Oil from expeller comes to the Vibro Separator, where core •particles are separated by vibration. The oil is then sent •to the tank where it is pumped for final filtration via plate •type filters. •Raised rim around the edges to form a chamber between •2 plates •High rate of filtration •Powerful pump and accurate assembly •Leak proof joints to withstand operating pressure •High grade CI casting & short blasted for smooth finish 	
<p>STEAM BOILER</p>	<p>Role of Boilers in edible oil refineries are crucial for many process operations, especially deodorization, to ensure complete removal of components such as color, odor, and moisture that would influence the appearance, smell, and taste of the final product. Edible oil is extracted from crude by the process of deodorization through steam distillation. Steam boilers in edible oil refineries enable the steam vacuum distillation with high-pressure steam for heating the oil to a determined temperature for removing the impurities and cooling it to regain the characteristics of the oil. Economizer helps boilers in oil refineries by extracting heat from the process to save energy.</p>

GLOBAL ECONOMY OUTLOOK

The baseline forecast is for the world economy to continue growing at 3.2 percent during 2024 and 2025, at the same pace as in 2023. A slight acceleration for advanced economies—where growth is expected to rise from 1.6 percent in 2023 to 1.7 percent in 2024 and 1.8 percent in 2025—will be offset by a modest slowdown in emerging market and developing economies from 4.3 percent in 2023 to 4.2 percent in both 2024 and 2025. The forecast for global growth five years from now—at 3.1 percent—is at its lowest in decades. Global inflation is forecast to decline steadily, from 6.8 percent in 2023 to 5.9 percent in 2024 and 4.5 percent in 2025, with advanced economies returning to their inflation targets sooner than emerging market and developing economies. Core inflation is generally projected to decline more gradually.

The global economy has been surprisingly resilient, despite significant central bank interest rate hikes to restore price stability. Chapter 2 explains that changes in mortgage and housing markets over the prepandemic decade of low interest rates moderated the near-term impact of policy rate hikes. Chapter 3 focuses on medium-term prospects and shows that the lower predicted growth in output per person stems, notably, from persistent structural frictions preventing capital and labor from moving to productive firms. Chapter 4 further indicates how dimmer prospects for growth in China and other large emerging market economies will weigh on trading partners.

The global economy remains remarkably resilient, with growth holding steady as inflation returns to target. The journey has been eventful, starting with supply-chain disruptions in the aftermath of the pandemic, a Russian-initiated war on Ukraine that triggered a global energy and food crisis, and a considerable surge in inflation, followed by a globally synchronized monetary policy tightening.

Yet, despite many gloomy predictions, the world avoided a recession, the banking system proved largely resilient, and major emerging market economies did not suffer sudden stops. Moreover, the inflation surge—despite its severity and the associated cost-of-living crisis—did not trigger uncontrolled wage-price spirals (see October 2022 World Economic Outlook). Instead, almost as quickly as global inflation went up, it has been coming down. On a year-over-year basis, global growth bottomed out at the end of 2022, at 2.3 percent, shortly after median headline inflation peaked at 9.4 percent.

According to our latest projections, growth for 2024 and 2025 will hold steady around 3.2 percent, with median headline inflation declining from 2.8 percent at the end of 2024 to 2.4 percent at the end of 2025. Most indicators point to a soft landing. Markets reacted exuberantly to the prospect of central banks exiting from tight monetary policy. Financial conditions eased, equity valuations soared, capital flows to most emerging market economies excluding China have been buoyant, and some low-income countries and frontier economies regained market access (see the April 2024 Global Financial Stability Report).

Even more encouraging, we now estimate that there will be less economic scarring from the pandemic—the projected drop in output relative to prepandemic projections—for most countries and regions, especially for emerging market economies, thanks in part to robust employment growth. Astonishingly, the US economy has already surged past its prepandemic trend.

First, while inflation trends are encouraging, we are not there yet. Somewhat worryingly, the most recent median headline and core inflation numbers are pushing upward. This could be temporary, but there are reasons to remain vigilant. Most of the progress on inflation came from the decline in energy prices and goods inflation below its historical average. The latter has been helped by easing supply-chain frictions, as well as by the decline in Chinese export prices. But services inflation remains high—sometimes stubbornly so—and could derail the disinflation path. Bringing inflation down to target remains the priority.

Second, the global view can mask stark divergence across countries. The exceptional recent performance of the United States is certainly impressive and a major driver of global growth, but it reflects strong demand factors as well, including a fiscal stance that is out of line with long-term fiscal sustainability (see April 2024 Fiscal Monitor). This raises short-term risks to the disinflation process, as well as longer-term fiscal and financial stability risks for the global economy since it risks pushing up global funding costs. Something will have to give. In the euro area, growth will pick up this year, but from very low levels, as the trailing effects of tight.

Third, even as inflation recedes, real interest rates have increased, and sovereign debt dynamics have become less favorable in particular for highly indebted emerging markets. Countries should turn their sights toward rebuilding fiscal buffers. Credible fiscal consolidations help lower funding costs and improve financial stability. In a world with more frequent adverse supply shocks and growing fiscal needs for safety nets, climate adaptation, digital transformation, energy security, and defense, this should be a policy priority. Yet this is never easy, as the April 2023 World Economic Outlook documented: fiscal consolidations are more likely to succeed when credible and when implemented while the economy is growing, rather than when markets dictate their conditions. In countries where inflation is under control, and that engage in a credible multiyear effort to rebuild fiscal buffers, monetary policy can help support activity. The successful 1993 US fiscal consolidation and monetary accommodation episode comes to mind as an example to emulate.

Fourth, medium-term growth prospects remain historically weak. Chapter 3 of this report takes an in-depth dive into the different drivers of the slowdown. The main culprit is lower total factor productivity growth. A significant part of the decline comes from increased misallocation of capital and labor within sectors and countries. Facilitating faster and more efficient resource allocation can help boost growth. Much hope rests on artificial intelligence (AI) delivering strong productivity gains in the medium term. It may do so, but the potential for serious disruptions in labor and financial markets is high. Harnessing the potential of AI for all will

require that countries improve their digital infrastructure, invest in human capital, and coordinate on global rules of the road. Medium-term growth prospects are also harmed by rising geoeconomic fragmentation and the surge in trade restrictive and industrial policy measures since 2019. Global trade linkages are already changing as a result, with potential losses in efficiency. But the broader damage is to global cooperation and multilateralism.

Finally, huge global investments are needed for a green and climate-resilient future. Cutting emissions is compatible with growth, as is seen in recent decades during which growth has become much less emissions intensive. Nevertheless, emissions are still rising. A lot more needs to be done and done quickly. Green investment has expanded at a healthy pace in advanced.

economies and China. Cutting harmful fossil fuel subsidies can help create the necessary fiscal room for further green investments. The greatest effort must be made by other emerging market and developing economies, which need to massively increase their green investment growth and reduce their fossil fuel investment. This will require technology transfer by other advanced economies and China, as well as substantial financing, much of it from the private sector, but some of it concessional.

Global activity has proved surprisingly resilient:

Global growth in 2023 continued at an annual rate above 3%, despite the drag exerted by tighter financial conditions and other adverse factors, including Russia's war of aggression against Ukraine and the evolving conflict in the Middle East. Global GDP growth is projected at 3.1% in 2024 and 3.2% in 2025, little changed from the 3.1% in 2023. This is weaker than seen in the decade before the global financial crisis, but close to currently estimated potential growth rates in both advanced and emerging market economies.

GDP growth projections for 2024 and 2025

%, year-on-year

Source: OECD Economic Outlook, May 2024.

Headline inflation in the OECD is projected to gradually ease from 6.9% in 2023 to 5.0% in 2024 and 3.4% in 2025, helped by tight monetary policy and fading goods and energy price pressures. By the end of 2025, inflation is expected to be back on central bank targets in most major economies.

GDP growth in the United States is projected to be 2.6% in 2024, before slowing to 1.8% in 2025 as the economy adapts to high borrowing costs and moderating domestic demand. In the euro area, which stagnated in the fourth quarter of 2023, a recovery in real household incomes, tight labour markets and reductions in policy

interest rates will help generate a gradual rebound. Euro area GDP growth is projected at 0.7% in 2024 and 1.5% in 2025.

Growth in Japan should recover steadily, with domestic demand underpinned by stronger real wage growth, continued accommodative monetary policy and temporary tax cuts. GDP is projected to expand by 0.5% in 2024 and 1.1% in 2025.

China is expected to slow moderately, with GDP growth of 4.9% in 2024 and 4.5% in 2025, as the economy is supported by fiscal stimulus and exports.

“The global economy has proved resilient, inflation has declined within sight of central bank targets, and risks to the outlook are becoming more balanced. We expect steady global growth for 2024 and 2025, though growth is projected to remain below its longer-run average,” **OECD Secretary-General Mathias Cormann** said. “Policy action needs to ensure macroeconomic stability and improve medium-term growth prospects. Monetary policy should remain prudent, with scope to lower policy interest rates as inflation declines, fiscal policy needs to address rising pressures to debt sustainability, and policy reforms should boost innovation, investment and opportunities in the labour market particularly for women, young people and older workers.”

Significant uncertainty remains. Inflation may stay higher for longer, resulting in slower-than-expected reductions in policy interest rates and leading to further financial vulnerabilities. Growth could disappoint in China, due to the persistent weakness in property markets or smaller-than-anticipated fiscal support over the next two years. High geopolitical tensions remain a significant near-term risk to activity and inflation, particularly if the evolving conflict in the Middle East and attacks in the Red Sea were to widen or escalate. On the upside, demand growth could prove stronger than expected, if households and firms were to draw more fully on the savings accumulated during COVID-19.

Against this backdrop, the Outlook lays out a series of policy recommendations, highlighting the need to ensure a durable reduction in inflation, establish a budgetary path that will address rising fiscal pressures and undertake reforms that improve prospects for medium-term growth.

Monetary policy needs to remain prudent, to ensure that inflationary pressures are durably contained. Scope exists to lower policy interest rates as inflation declines, but the policy stance should remain restrictive in most major economies for some time to come.

Governments face rising fiscal challenges given high debt levels and sizeable additional spending pressures from population ageing, and climate adaptation and mitigation. Future debt burdens are likely to rise significantly if no action is taken, highlighting the need for stronger near-term efforts to contain spending growth, improve public spending efficiency, reallocate spending to areas that better support opportunities and growth, and optimise tax revenues.

“The foundations for future output and productivity growth need to be strengthened by ambitious structural policy reforms to improve human capital and take advantage of technological advances,” OECD Chief Economist Clare Lombardelli said.

INDIAN ECONOMY OUTLOOK

Introduction

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as

among the key driver of the GDP in the first half of FY24. During the period January-March 2024, India's exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Market Size

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- According to HSBC Flash India PMI report, business activity surged in April to its highest level in about 14 years as well as sustained robust demand. The composite index reached 62.2, indicating continuous expansion since August 2021, alongside positive job growth and decreased input inflation, affirming India's status as the fastest-growing major economy.
- As of April 12, 2024, India's foreign exchange reserves stood at US\$ 643.162 billion.
- In 2023, India saw a total of US\$ 49.8 billion in PE-VC investments.
- Merchandise exports in March 2024 stood at US\$ 41.68 billion, with total merchandise exports of US\$ 437.06 billion during the period of April 2023 to March 2024.
- India was also named as the 48th most innovative country among the top 50 countries, securing 40th position out of 132 economies in the Global Innovation Index 2023. India rose from 81st position in 2015 to 40th position in 2023. India ranks 3rd position in the global number of scientific publications.
- In March 2024, the gross Goods and Services Tax (GST) stood at second highest monthly revenue collection at Rs.1.78 lakh crore (US\$ 21.35 billion), of which CGST is Rs. 34,532 crore (US\$ 4.14 billion), SGST is Rs. 43,746 crore (US\$ 5.25 billion).
- Between April 2000–December 2023, cumulative FDI equity inflows to India stood at US\$ 971.52 billion.
- In February 2024, the overall IIP (Index of Industrial Production) stood at 147.2. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 139.6, 144.5 and 187.1, respectively, in February 2024.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 5.69% in December 2023.
- Foreign Institutional Investors (FII) inflows between April-July (2023-24) were close to Rs. 80,500 crore (US\$ 9.67 billion), while Domestic Institutional Investors (DII) sold Rs. 4,500 crore (US\$ 540.56 million) in the same period. As per depository data, Foreign Portfolio Investors (FPIs) invested (US\$ 8.06 billion) in India during January-April 2024.
- The wheat procurement during RMS 2023-24 (till May) was estimated to be 262 lakh metric tonnes (LMT) and the rice procured in KMS 2023-24 was 385 LMT. The combined stock position of wheat and rice in the Central Pool is over 579 LMT (Wheat 312 LMT and Rice 267 LMT).

Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, is aimed at creating immense opportunities in India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

- In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).
- On January 22, 2024, Prime Minister Mr. Narendra Modi announced the 'Pradhan Mantri Suryodaya Yojana'. Under this scheme, 1 crore households will receive rooftop solar installations.
- On September 17, 2023, Prime Minister Mr. Narendra Modi launched the Central Sector Scheme PM-VISHWAKARMA in New Delhi. The new scheme aims to provide recognition and comprehensive support to traditional artisans & craftsmen who work with their hands and basic tools. This initiative is designed to enhance the quality, scale, and reach of their products, as well as to integrate them with MSME value chains.
- On August 6, 2023, Amrit Bharat Station Scheme was launched to transform and revitalize 1309 railway stations across the nation. This scheme envisages development of stations on a continuous basis with a long-term vision.

- On June 28, 2023, the Ministry of Environment, Forests, and Climate Change introduced the 'Draft Carbon Credit Trading Scheme, 2023'.
- The Government of India is expected to increase public health spending to 2.5% of the GDP by 2025.

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023. With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

INDIAN FMCG INDUSTRY

The fast-moving consumer goods (FMCG) sector is India's fourth-largest sector and has been expanding at a healthy rate over the years as a result of rising disposable income, a rising youth population, and rising brand awareness among consumers. With household and personal care accounting for 50% of FMCG sales in India, the industry is an important contributor to India's GDP.

India is a country that no FMCG player can afford to ignore due to its middle-class population which is larger than the total population of the USA. The Indian FMCG market continues to rise as more people start to move up the economic ladder and the benefits of economic progress become accessible to the general public. More crucially, with a median age of just 27, India's population is becoming more consumerist due to rising ambitions. This has been further aided by government initiatives to increase financial inclusion and establish social safety nets.

Growing awareness, easier access, and changing lifestyles have been the key growth drivers for the sector. The urban segment (which accounts for a revenue share of around 55%) is the largest contributor to the overall revenue generated by the FMCG sector in India. However, in the last few years, the FMCG market has grown at a faster pace in rural India compared to urban India. Semi-urban and rural segments are growing at a rapid pace and FMCG products account for 50% of the total rural spending.

FMCG giants such as Johnson & Johnson, Himalaya, Hindustan Unilever, ITC, Lakmé, and other companies (that have dominated the Indian market for decades) are now competing with D2C-focused start-ups such as Mamaearth, The Moms Co., Bey Bee, Azah, Nua and Pee Safe. Market giants such as Revlon and Lotus took ~20 years to reach the Rs. 100 crore (US\$ 13.4 million) revenue mark, while new-age D2C brands such as Mamaearth and Sugar took four and eight years, respectively, to achieve that milestone.

Advertising volumes on television recorded healthy growth in the July-September quarter, registering 461 million seconds of advertising, which is the highest in 2021. FMCG continued to maintain its leadership position with a 29% growth in ad volumes against the same period in 2019. Even the e-commerce sector showed a healthy 26% jump over 2020.

Rural consumption has increased, led by a combination of increasing income and higher aspiration levels. There is an increased demand for branded products in rural India. On the other hand, with the share of the unorganized market in the FMCG sector falling, the organized sector growth is expected to rise with an increased level of brand consciousness, augmented by the growth in modern retail. Another major factor propelling the demand for food services in India is the growing youth population, primarily in urban regions. India has a large base of young consumers who form the majority of the workforce, and due to time constraints, barely get time for cooking. Online portals are expected to play a key role for companies trying to enter the hinterlands. The Internet has contributed in a big way, facilitating a cheaper and more convenient mode to increase a company's reach. The number of internet users in India is likely to reach 1 billion by 2025. It is estimated that 40% of all FMCG consumption in India will be made online by 2020. E-commerce share of total FMCG sales is expected to increase by 11% by 2030. It is estimated that India will gain US\$ 15 billion a year by implementing GST. GST and demonetization are expected to drive demand, both in the rural and urban areas and economic growth in a structured manner in the long term and improved the performance of companies within the sector.

INDIAN SPICE INDUSTRY

Overview

India is the world's largest spice producer. It is also the largest consumer and exporter of spices. The production of different spices has been growing rapidly over the last few years. Production in 2021-22 stood at 10.88 million tonnes. During 2020-21, the export of spices reached an all-time high both in terms of value and volume by registering a growth of 17% in US\$ value terms and 30% in volume terms. During 2021-22, the single largest spice exported from India was chili followed by spice oils and oleoresins, mint products, cumin, and turmeric.

India produces about 75 of the 109 varieties listed by the International Organization for Standardization (ISO). The most produced and exported spices are pepper, cardamom, chili, ginger, turmeric, coriander, cumin, celery, fennel, fenugreek, garlic, nutmeg & mace, curry powder, spice oils, and oleoresins. Out of these spices, chili, cumin, turmeric, ginger, and coriander makeup about 76% of the total production.

The largest spices-producing states in India are Madhya Pradesh, Rajasthan, Gujarat, Andhra Pradesh, Telangana, Karnataka, Maharashtra, Assam, Orissa, Uttar Pradesh, West Bengal, Tamil Nadu, and Kerala.

Export Market

India is the largest exporter of spice and spice items. For the year 2021-22, the country exported spices worth US\$4,102.29 million.

Src: <http://www.indianspices.com/>

India is the largest exporter of spice and spice items. During April-Feb 2023, the country exported spices worth US\$ 3,332.02 million.

In February 2023, the exports of spices from India increased by 44.12% to US\$ 379.51 million. In 2021-22, India exported 1.53 million tonnes of spices. From 2017-18 to 2021-22, the total exported quantity from India grew at a CAGR of 10.47%.

For FY22, total volumes of chilli, cumin, turmeric and ginger exports were 0.55, 0.21, 0.15 and 0.14 million tonnes.

Chilli

Chilli harvesting is complete in almost all chili-producing states of India. The Post-harvest operations at farms continued in major chili-producing states like Andhra Pradesh and Telangana.

Market Trend: Chilli arrivals to markets have decreased considerably and are expected interim gently till the end of April. The farmers and traders are selling their products continuously in the market due to very good prices and are not holding onto their inventory. The cold storage inventory in all the chilly growing regions is only filled up to 50-60 % as the arrivals are very less from both traders and farmers.

Turmeric

The initial forecast of production was high as Turmeric sowing increased by 10-15% across India. However, incessant and widespread rains from September to November led to crop damage almost by 15-20% in Maharashtra and Andhra Pradesh. Turmeric production during the 2022 season is estimated to be around 7 – 7.20 million bags (3,75,000– 4,05,000 MT), almost short by 20% against the 2021 crop. Carryover stock is estimated to be around 2.30 million bags (1,23,000 MT) during February 2022. As per estimates, the total supply for the new season would be around 9 – 9.30 million bags (485,000 – 510,000 MT) including carryover stocks. India consumes more than 80% of the total turmeric production.

Market Trend: Regular finger turmeric prices declined at domestic markets during March 2022 due to good arrivals from new crops and less export demand. Yellow spice lost its color and flavor in domestic markets in terms of price when cumin prices declined in international markets. Currently, finger turmeric is traded at Rs. 75 – 82/kg levels.

Pepper

Pepper harvesting in India is at its last phase and it is estimated to be over by the second half of April. Hence, pepper production in India during 2022 is estimated to be around 55000 – 60000 tons.

Market Trend: Indian pepper prices continued their declining trend during March due to good arrivals and less demand from exporters. Ungarbled pepper was traded at Rs. 490 – 500/kg at domestic markets whereas, garbled pepper was traded at Rs. 530/kg levels.

Potential to grow 2x to INR 50,000 crores by 2025

The Indian blended spices market is growing faster than straight spices. It is expected to reach a 35% share of the total organized spices pie by 2025.

Government Initiatives & Recent Developments in the Spice Industry

Export Development and Promotion of Spices

This initiative by the Spices Board of India aims to support the exporter to adopt high-tech processing technologies and upgrade the existing level of technology for the development of industry and to meet the changing food safety standards of the importing countries. The initiative provides benefits of infrastructure development, promoting Indian spice brands abroad, setting up infrastructure in the major spice growing centers, and promoting organic spices and special programs for north-eastern entrepreneurs.

Setting up and maintenance of infrastructure for common processing (Spices Parks)

Spices Board has launched crop-specific Spices Parks in key production/market centers with an aim to facilitate the farmers to get an improved price realization and wider reach for their produce. The purpose of the park is to have an integrated operation for cultivation, post-harvesting, processing, value-addition, packaging, and storage of spices and spice products. The common processing facilities for cleaning, grading, packing, and steam sterilization will help the farmers to enhance the quality of the produce, resulting in better price realization.

Spice Complex Sikkim

Spices Board submitted a project proposal to the State's Cell for setting up a Spice Complex in Sikkim seeking financial assistance for facilitating and demonstrating common processing and value addition in spices to help farmers and other stakeholders in the state.

OVERVIEW

Our Company was incorporated on January 29, 2019 as ‘**Srivari Spices and Foods Private Limited**’, a private limited company under the Companies Act, 2013, pursuant to a certificate of incorporation dated January 30, 2019 issued by the Deputy Registrar of Companies, Central Registration Centre. Subsequently, our Company was converted into a public limited company and consequently the name of our Company was changed to ‘**Srivari Spices and Foods Limited**’ and a fresh certificate of incorporation dated December 27, 2022 was issued by the Registrar of Companies, Telangana at Hyderabad. The corporate identification number of our Company is **L15494TG2019PLC130131**.

Our Company is engaged in the business of manufacturing spices and flour (chakki atta) and market & sell it in and around Telangana and Andhra Pradesh. We handpick our raw materials from various parts of the country and process our products with utmost care without the use of artificial preservatives or chemicals, thereby creating a product portfolio of organic spices and flour, which carry the freshness and goodness of each ingredient. Our unique business model has helped us penetrate the niche segment of our market and establish a customer base in and around Telangana and Andhra Pradesh. Our goal since our incorporation was to manufacture quality spices and other food products which are organic and do not contain any artificial preservatives or chemicals, and in order to achieve our goal we have created a unique business model, wherein we manufacture and package our products in quantities which can sustain a customer until the shelf life of our product, in order to avoid wastage and deliver a wide range of products which carry the freshness and goodness of each ingredient. Our business has two model first is direct to customer (“**D2C**”) in nature, wherein we deliver our products directly at the doorstep of our customers using approximately 15,000 retail stores. Secondly, we also work in business to business (“**B2B**”), wherein we deliver our products to the suppliers. Our business model has helped us create a strong customer base as the quantity of our products packed and delivered in directly proportional to the shelf life of our products, therefore, once the product is consumed by our customers, they place an order for the product and this helps us maintain a cyclic and continuous relationship with our customers.

We started our business operations in 2019 by setting up a state of art production facility at Survey number 234/4, and 234/5, Jalpally Village, Balapur Mandal, Jalpally Municipality, Ranga Reddy District, Telangana and manufacturing turmeric powder (haldi), chilli powder (mirchi) and coriander powder (dhaniya). In December 2021, we expanded our business operations by diversifying our product portfolio into madras sambar masala, chicken masala, garam masala and mutton masala in pouches, boxes and bottles. In 2021, our Company was awarded with the title of ‘Best Emerging Spices Brand- 2021’ by Business Mint. Further, in the year 2021, our Company expanded its business operations by setting up a new manufacturing unit at Raikal Village, Farooqnagar Mandal, Ranga Reddy District, Telangana. Lastly, in October 2022 we introduced a new product category by manufacturing whole wheat flour (chakki atta).

Our business model and our products are completely sustainable in nature. We source our raw materials directly from farmers to ensure that we use absolutely natural ingredients in our products. Our business model ensures that the farmers receive complete benefit of their produce without having to share their revenue with market intermediaries. Since, we source our raw materials directly from the farmers, we are able to offer our products at a lower range than our competitors, thereby having a unique pricing model. We source our raw materials from across the country to ensure that the products we manufacture have an authentic taste without artificially disturbing the natural taste of the spices or other food products. For instance, for our chilli powder we source our chillies from the farms of Guntur, Khammam, Warangal, Raichur, Byadgi, Malakpet, Hyderabad and our ‘Srivari Whole Wheat Atta’ and ‘Sharbati Atta’ is made from wheat grains which are sourced from Sehore, Vidisha and Sironj in Madhya Pradesh. Therefore, each of our products is made from the finest natural produce which caters to the genuine taste and an assurance of authenticity.

Sharbati wheat, also known as "Sharbati atta" or "Sharbati gehun" in Hindi, is a distinct variety of wheat primarily cultivated in the central region of India, particularly in Madhya Pradesh. Unlike regular wheat, which encompasses various wheat varieties grown worldwide, Sharbati wheat stands out due to its specific attributes.

Here are the key differences between Sharbati wheat and regular wheat:

Protein content: Sharbati wheat possesses a slightly higher protein content compared to regular wheat, making it an excellent choice for bread-making purposes.

Flavor: Sharbati wheat offers a unique nuttier and sweeter flavor profile, making it a popular preference for creating chapatis or rotis, traditional Indian breads.

Gluten content: Sharbati wheat contains a lower gluten content than regular wheat, which makes it less suitable for producing pastries or cakes that require more gluten for proper texture and structure.

Yield: Sharbati wheat has a lower yield than regular wheat, leading to higher production costs and limited availability in comparison. As a result, it is considered relatively more expensive and less commonly found.

Nutritional value: Sharbati wheat boasts a higher nutritional value, serving as a good source of essential vitamins and minerals like iron, calcium, and potassium. This aspect contributes to its reputation as a healthier alternative to regular wheat.

In summary, Sharbati wheat represents a specific variety of wheat with distinct characteristics. Its higher protein content, sweeter flavor, lower gluten content, and enhanced nutritional value make it an ideal choice for making traditional Indian breads such as chapatis or rotis. However, its lower yield and relatively higher cost limit its widespread availability.

Since incorporation, it has been our Company’s vision and focus to manufacture and supply superior quality products to our customers, which has enabled us to expand our business operations and receive certifications for our products and efficient processing techniques. We have a quality control and assurance division (“**Quality Division**”) in all our manufacturing units which carries out the required tests on the materials received including raw materials which are used in the manufacturing process and also on the final products. Our Quality Division also carries out tests on all the stages of our manufacturing processes to ensure that the quality is built through the process. We ensure adherence to the regulatory standards laid down for our products.

We operate from two manufacturing units located in Telangana namely, Unit – I situated at 234/5, Jalpally Village, Balapur Mandal, Jalpally Municipality, Ranga Reddy District, Telangana and Unit – II situated at Raikal Village, Farooqnagar Mandal, Ranga Reddy District, Telangana, respectively. Our Company had commenced its business operations from Unit – I and had set up Unit - II in 2021 to expand its manufacturing operations. Unit-II has been set up to manufacture ‘Srivari Whole Wheat Atta’ and ‘Sharbati Atta’, thereby enabling our Company to expand its product portfolio and customer base. Our units are well equipped with machineries and other handling equipment to facilitate smooth manufacturing process. Along with this, the units also have an in-house laboratory for testing the quality of products.

Our revenues from operations for the Fiscals 2024 was ₹ 7,828.33 lakhs. Our EBITDA for the Fiscals 2024 was ₹ 1255.96 lakhs. Our profit after tax for the Fiscals 2024 was ₹ 703.39 lakhs. For further details, please refer to the section titled “*Financial Information*” on page 102 of this Letter of Offer.

Independent Auditor's Report

To the Members of Srivari Spices and Foods Limited

(Formerly known as Srivari Spices and Foods Private Limited)

Report on the Audit of the Consolidated Financial Statements

Opinion

1. We have audited the accompanying consolidated financial statements of Srivari Spices and Foods Limited (Formerly known as Srivari Spices and Foods Private Limited) ('the Holding Company') and its subsidiary (the Holding Company and its subsidiaries together referred to as 'the Group'), as listed in Annexure 1, which comprise the Consolidated Balance Sheet as at 31 March 2024, the Consolidated Statement of Profit and Loss, and the Consolidated Cash Flow Statement for the year then ended, and notes to the consolidated financial statements, including a summary of the significant accounting policies and other explanatory information.
2. In our opinion and to the best of our information and according to the explanations given to us the aforesaid consolidated financial statements give the information required by the Companies Act, 2013 ('the Act') in the manner so required and give a true and fair view in conformity with the Accounting Standards specified under section 133 of the Act read with the Companies (Accounting Standards) Rules, 2021 and other accounting principles generally accepted in India, of the consolidated state of affairs of the Group, as at 31 March 2024, and their consolidated profit, and consolidated cash flows for the year ended on that date.

Basis for Opinion

3. We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group, in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ('ICAI') together with the ethical requirements that are relevant to our audit of the consolidated financial statements under the provisions of the Act and the rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our qualified opinion.

Key Audit Matter

4. Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Information other than the Consolidated Financial Statements and Auditor's Report thereon

5. The Holding Company's Board of Directors are responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the

consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

6. The accompanying consolidated financial statements have been approved by the Holding Company's Board of Directors. The Holding Company's Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation and presentation of these consolidated financial statements that give a true and fair view of the consolidated financial position, consolidated financial performance and consolidated cash flows of the Group in accordance with the Accounting Standards specified under section 133 of the Act read with the Companies (Accounting Standards) Rules, 2021 and other accounting principles generally accepted in India. The respective Board of Directors of the companies included in the Group are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Group and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Board of Directors of the Holding Company, as aforesaid.
7. In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group are responsible for assessing the ability of the Group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.
8. Those respective Board of Directors are also responsible for overseeing the financial reporting process of the companies included in the Group.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

9. Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.
10. As part of an audit in accordance with Standards on Auditing specified under section 143(10) of the Act we exercise professional judgment and maintain professional skepticism throughout the audit. We also:
 - Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances Under section 143(3)(i) of the Act we are also responsible for expressing our opinion on whether the Holding Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls;
 - Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management;
 - Conclude on the appropriateness of Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Group to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern;
 - Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation; and
 - Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group, to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit of financial statements of such entities included in the financial statements, of which we are the independent auditors.
11. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
 12. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

Annexure A

Independent Auditor's Report on the internal financial controls with reference to financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ('the Act')

1. In conjunction with our audit of the consolidated financial statements of Srivari Spices and Foods Limited (Formerly known as Srivari Spices and Foods Private Limited) ('the Holding Company') and its subsidiaries (the Holding Company and its subsidiaries together referred to as 'the Group'), as at and for the year ended 31 March 2024, we have audited the internal financial controls with reference to financial statements of the Holding Company, its subsidiary companies, , which are companies covered under the Act, as at that date.

Responsibilities of Management and Those Charged with Governance for Internal Financial Controls

2. The respective Board of Directors of the Holding Company, its subsidiary companies, which are companies covered under the Act, are responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("framework"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the Company's business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility for the Audit of the Internal Financial Controls with Reference to Financial Statements

3. Our responsibility is to express an opinion on the internal financial controls with reference to financial statements of the Holding Company, its subsidiary companies, as aforesaid, based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India ('ICAI') prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements, and the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting ('the Guidance Note') issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and if such controls operated effectively in all material respects.
4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements includes obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls with reference to financial statements of the Holding Company, {its subsidiary companies, its associate companies and joint venture companies} as aforesaid.

Meaning of Internal Financial Controls with Reference to Financial Statements

6. A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements

for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

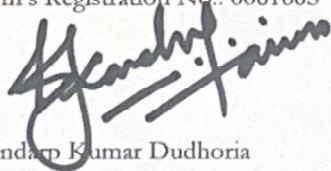

Inherent Limitations of Internal Financial Controls with Reference to Financial Statements

7. Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Holding Company, its subsidiary companies, , which are companies covered under the Act, have in all material respects, adequate internal financial controls with reference to financial statements and such controls were operating effectively as at 31 March 2024, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("framework").

Deferred tax charges or credits reflect the tax effect of timing differences between accounting income and taxable income for the period. The deferred tax charges or credits and the corresponding deferred tax liabilities or assets are recognized using the tax rates that have been enacted or substantively enacted by the balance sheet date. Deferred tax assets are recognized only to the extent there is reasonable certainty that the assets can be realized in the future periods, however, where there is unabsorbed depreciation or carried forward loss under taxation laws, deferred tax assets are recognized only if there is a virtual certainty of realization of such assets. Deferred tax assets are reviewed at each balance sheet date and written down or written up to reflect the amount that is reasonably/virtually certain (as the case may be) to be realized.

Minimum Alternate Tax

Minimum alternate tax (MAT) paid in a year is charged to the Statement of Profit and Loss as current tax. The Company recognizes MAT credit available as an asset only to the extent that there is convincing evidence that the Company will pay normal income tax during the specified period i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes MAT credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of MAT under the Income-tax Act, 1961, the said asset is created by way of credit to the Statement of Profit and Loss and shown as "MAT Credit Entitlement." The Company reviews the "MAT Credit Entitlement" asset at each reporting date and writes down the asset to the extent the company does not have convincing evidence that it will pay normal tax during the specified period.

p. Provisions and contingent liabilities

Provision is recognized when the Company has a present obligation as a result of a past event and when it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to their present value and are determined based on management's best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date and adjusted to reflect the current management estimates. A disclosure of a contingent liability is made when there is a possible or a present obligation that may, but probably will not, require an outflow of resources.

q. Cash and cash equivalents

Cash and cash equivalents in the balance sheet comprise cash at bank and in hand and short-term investments, with original maturity of less than or equal to three months.

Profit/ (loss) from continuing and discontinuing operation	703.39	309.15

FACTORS AFFECTING OUR RESULTS OF OPERATIONS

Except as otherwise stated in this Letter of Offer and the Risk Factors given in the Letter of Offer, the following important factors could cause actual results to differ materially from the expectations include, among others:

Regulatory Framework

We have obtained all regulatory permissions which are necessary to run our business, Further, some of the approvals are granted for fixed periods of time and need renewals, which are obtained in the course of business, however, there may be change in statutory regulations at any time which cannot be predicted by us. There can be no assurance that the change in regulations will not impact our operations in the future.

Ability of Management

Our success depends on the continued services and performance of the members of our management team and other key employees. Competition for senior management in the industry is intense, and we may not be able to retain our existing senior management or attract and retain new senior management in the future. The loss of the services of our Promoters could seriously impair our ability to continue to manage and expand our business. Further, the loss of any other member of our senior management or other key personnel may adversely affect our business, results of operations and financial condition.

Ability to manage logistics and transportation needs

Apart from in-house transportation facility we rely on third party transportation and other logistic facilities at every stage of our business activity including for procurement of products from our suppliers and for transportation from our factory to our customers and other markets. Since the cost of our goods also carried by third party transporters is typically much higher than the consideration paid for transportation, it may be difficult for us to recover damages for damaged, delayed or lost goods. Our operations and profitability are dependent upon the availability of transportation and other logistic facilities in a time and cost-efficient manner. Accordingly, our business is vulnerable to increased transportation costs, transportation strikes and lock-outs, shortage of labour, delays and disruption of transportation services for events such as weather-related problems and accidents. Further, global supply chains can be impacted with the increase in the fees of shipping routes putting cost pressures. Further, movement of goods encounters additional risks such as accidents, pilferage, spoilage or shrinkage may adversely affect our operations, results of operations and financial condition. Although we have not experienced any material logistics and transport related disruptions in the past, any prolonged disruption or unavailability of such facilities in a timely manner could result in delays or non-supply or may require us to look for alternative sources which may not be cost-effective, thereby adversely affecting our operations, results of operations, cash flows and financial condition.

Market & Economic conditions

India is one of the largest economies and is growing at a rapid pace. But in this globalised economy, all the businesses face an uncertain level of volatility from unexpected global events which ranges from global pandemics to wars, to weather changes to supply chain disruption, which may change the economic dynamics and the purchasing capability of the end customers. At the time of market slowdown, the demand falls which has adverse impact on our business. ***Competition***

We operate in a competitive atmosphere. Our competition varies by market, geographic areas and type of products. Our Company may face stiff competition from domestic as well as global market as the dynamic changes. Some of our competitors may have greater resources than those available to us. While service quality, technical ability, performance records, etc are key factors in client decisions among competitors, however, price & quality are the deciding factor in most cases. Further, this industry is fragmented with many small and medium sized companies and entities, which manufactures some of these products at various levels, which may adversely affect our business operation and financial condition. Further, there are no entry barriers in this industry and any expansion in capacity of existing manufacturers would further intensify competition. Moreover, as we seek to diversify into new geographical areas, new territories, new emerging markets, we face competition from competitors that have a pan-India presence and also from competitors that have a strong presence in regional markets. The markets in which we compete and intend to compete are undergoing, and are expected to continue to undergo, rapid and significant change. We expect competition to intensify as technological advances and consolidations continue. These competitive factors may force us to reduce rates, and

to pursue new market opportunities. Increased competition could result in reduced demand for our products, increased expenses, reduced margins and loss of market share. Failure to compete successfully against current or future competitors could harm our business, operating cash flows and financial condition.

Significant Developments after March 31st, 2024 that may affect our Future Results of Operations

The Directors confirm that there have been no other events or circumstances since the date of the last financial statements as disclosed in the Letter of Offer which materially or adversely affect or is likely to affect the business or profitability of our Company or the value of our assets, or our ability to pay liabilities within next twelve months.
