### SUMMARY OF INDUSTRY

#### Textile Market

The global textile market is valued at approximately USD 760.28 billion in 2025 and is projected to grow to USD 974.38 billion by 2030, at a CAGR of around 5.09%. This growth is driven by increasing demand for natural and sustainable fibers, eco-friendly practices, government investments, expansion of e-commerce in apparel, and applications spanning fashion, technical textiles, and industrial uses. The Asia-Pacific region leads the market with a 54% share, supported by abundant raw materials, low labour costs, and major players like China and India. North America experiences growth from premium and military-grade textile demand, while Europe emphasizes sustainability. Challenges such as rising production costs, fluctuating raw material prices, labour expenses, and environmental pressures persist, but advances in smart textiles, 3D knitting, and eco-friendly methods provide competitive advantages.<sup>1</sup>

The Indian textile and apparel sector, valued at USD 222.08 billion in 2024, is forecasted to reach USD 646.96 billion by 2033, with a robust CAGR of 11.98%. This growth is propelled by increasing e-commerce penetration, demand for sustainable fabrics, and supportive government initiatives like the "Make in India" campaign. India is strengthening its position as a global leader in yarn production, weaving, and textile exports, driven by its manufacturing capabilities and rising consumer demand.<sup>2</sup> Key trends influencing the market include the rising preference for sustainable and ethical materials, rapid technological advancements such as automation and AI-driven production, and the growing importance of digital sales channels. Although cost pressures and environmental concerns present hurdles, the textile industry continues to innovate with eco-friendly fibres and smart textile technologies to maintain steady growth and sustainability focus.<sup>3</sup>

The combination of Asia-Pacific dominance, strong Indian sector growth, technological innovation, and shifting consumer preferences underpins the global textile market's dynamic and competitive landscape in the mid-2020s to 2030s. This balance highlights steady expansion despite challenges in production costs and environmental sustainability.<sup>4</sup>

### SUMMARY OF OUR BUSINESS

Our Company was initially established as "Sumeet Synthetics Private Limited" under the Companies Act, 1956, and received its Certificate of Incorporation from the Registrar of Companies, Gujarat, on August 01, 1988. Following its conversion to a public limited company, the name was changed to "Sumeet Synthetics Limited," with a fresh Certificate of Incorporation issued by the Registrar of Companies, Gujarat, on February 26, 1992. Subsequently, the name of the Company was changed to its name to "Sumeet Industries Limited," vide a fresh Certificate of Incorporation dated September 1, 1996, issued by the Registrar of Companies, Gujarat. The Company has come out with Initial Public Offering in 1993, listing its Equity Shares on the Bombay Stock Exchange and the Baroda Stock Exchange. The shares were later delisted from the Baroda Stock Exchange effective January 09, 2007. The Company was further listed on the National Stock Exchange of India Limited on December 10, 2010.

Initially focused on manufacturing and exporting synthetic yarn, the company established its first manufacturing facility for Polypropylene Multifilament Yarn ("PPMFY") in 1993. Over the years, the Company expanded its PPMFY capacity by approximately 2.6 times in 1997–98 to meet growing demand. In 2004, as part of a backward integration strategy, it set up a Polyester Filament Yarn ("PFY") manufacturing facility with an annual capacity of 12,000 tons, using state-of-the-art technology from Barmag, Germany. As part of our commitment to sustainable growth, we also installed a coal-based captive power plant in 2004,

which was later converted to a gas-based plant to address environmental concerns and rising coal costs. In 2005, we expanded our product offerings by setting up a weaving division equipped with high-speed Waterjet Looms imported from Tsudakoma, Japan, with a capacity to produce 3.5 million metres of woven fabric annually.

Diversifying further, we established a Menthol Distilling & Crystallizing plant in 2006, with an annual capacity of 900 metric tons of peppermint oil and 300 metric tons of menthol crystals. This step enabled us to enter the production of value-added products, and the Indian government recognized us as a Star Export House.

The Company was established with the primary objective of manufacturing and exporting synthetic yarn. In 1993, we established our first manufacturing facility for the production of Polypropylene Multifilament Yarn. During 1997–98, we expanded our PPMFY installed capacity by approximately 2.6 times to cater to the growing demand for its products.

Over the years, we have continuously invested in modernizing our operations. In 2009, we commissioned a 100,000 Tons Per Annum (“TPA”) Continuous Polymerization Plant and a 6 MW gas-based Captive Power Plant. In 2010, we expanded our production with the commissioning of a 23,500 TPA Polyester Filament Yarn Plant and a 21,000 TPA Fully Drawn Yarn (“FDY”) Plant. By 2012, we doubled our spinning capacity to 1,00,000 TPA and added an 8.6 MW captive genset power plant. Our focus on sustainability continued in 2013 when we commissioned a 5,400 TPA waste recycling plant, and we further upgraded our FDY production capacity to 51,450 TPA. Building on this momentum, the 1,00,000 TPA Continuous Polymerization Plant enabled the production of high-quality PET Chips, a critical raw material for our polyester yarn lines. This backward integration solidified our position as a leading integrated polyester manufacturer, with PET Chips output exceeding 1,00,000 tons annually. In the past, this capacity supported exports to over 20 global markets across Asia, Latin America, the Middle East, and Africa, including Italy, Argentina, Vietnam, Indonesia, Bangladesh, Mexico, Greece, Algeria, Kenya, Colombia, Peru, Egypt, Brazil, and Turkey.

In 2014, we enhanced our ability to produce texturized yarns with the addition of four new texturizing machines, bringing our capacity to 7,200 TPA. We also upgraded our FDY line to manufacture Bright and Coloured FDY yarns and installed 25 TFO machines dedicated to plying and twisting carpet yarns. In 2016, we took another step toward sustainability by commissioning a 4.80 MW furnace oil-based captive genset power plant, with plans for further expansion.

On July 16, 2024, the resolution plan proposed by the Eagle Group (which is also active in the textile and apparel manufacturing and trading sector) for acquiring Sumeet Industries Ltd received approval from the NCLT Ahmedabad bench. Supported by the Committee of Creditors, it enables a seamless transition of control to Eagle Group under the Corporate Insolvency Resolution Process. The objective is to maximize value for all stakeholders, ensuring the Company continued success under new leadership, along with capital restructuring and the re-listing of shares, effective August 05, 2025. Moving forward, in 2026, we expanded our FDY capacity with the addition of a new production line capable of manufacturing 40 tons per day of value-added yarns. The Board of the Company recently approved strategic investment for a 27% stake in Hi-Urja Techno LLP, a solar power firm, enabling captive renewable energy sourcing via a Power Purchase Agreement for 11 MW from its Gujarat plant. Furthermore, the board also approved strategic investment for 27% in Bajrang Green Energy One Pvt. Ltd. a wind Power generating company enabling wind captive power by entering Power Purchase agreement for 4.2 MW to be sourced from its Gujarati Plant.

## INTENTION AND EXTENT OF PARTICIPATION BY OUR PROMOTERS IN THE ISSUE

Our Promoters and members of the Promoter Group have, vide letter dated March 06, 2026, collectively declared and confirmed that they will forgo their entitlement to Equity Shares that may arise from the Issue.

As per SEBI master circular No. SEBI/HO/CFD/PoD2/CIR/P/0155 dated November 11, 2024, a listed entity shall adopt any one method to achieve compliance with the MPS requirements mandated under rules 19(2)(b) and 19A of the SCRR read with regulation 38 of the LODR Regulations. In this regard the Company is making a rights issue to public shareholders and the Promoter and Promoter group shall forgo their entitlement that may arise from such issue so as to reduce their shareholding in an attempt to meet minimum public shareholding requirements as stipulated under the SEBI Listing Regulations as per the timelines prescribed.

The decision of the promoter to forgo their entitlement to Equity Shares is in line with the requirements laid down under the Securities Contracts (Regulation) Rules, 1957 ("SCRR"), particularly Rule 19A(5), which mandates that listed companies must maintain a minimum public shareholding of 25%.

Our Company underwent a Corporate Insolvency Resolution Process proceeding pursuant to the Insolvency and Bankruptcy Code, 2016. On July 16, 2024, the resolution plan proposed by the Eagle Group for the acquisition of the Company was approved by the Hon'ble NCLT, Ahmedabad Bench, with the support of the Committee of Creditors, enabling a seamless transition of control to the Eagle Group under the Corporate Insolvency Resolution Process. Pursuant to the implementation of the approved Resolution Plan under Section

31 of the Insolvency and Bankruptcy Code, 2016, the management and control of the Company were transferred to the Eagle Group with effect from August 05, 2025. Consequently, the promoter and promoter group shareholding currently stands at 89.83% of the total paid-up equity share capital, resulting in the public shareholding falling below the SEBI-mandated Minimum Public Shareholding (MPS) requirement of 25%.

Pursuant to implementation of the approved Resolution Plan, the Promoter's shareholding exceeded the prescribed MPS threshold. Accordingly, the Company was required to take appropriate steps to restore compliance with MPS norms. In line with the applicable provisions of the SCRR, Regulation 38 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, and relevant SEBI circulars, the Company has adopted the Rights Issue method for public shareholders, whereby the Promoters shall forgo their entitlement to equity shares that may arise from such issue so as to reduce their shareholding in an attempt to meet minimum public shareholding requirements as stipulated under the SEBI Listing Regulations as per the timelines prescribed.

The Promoter's non-participation in the Rights Issue is therefore intended to facilitate dilution of promoter shareholding and enable the Company to achieve compliance with the minimum public shareholding requirements within the prescribed regulatory framework. Further, in accordance with Regulation 86(1) of the SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2018, the requirement of minimum subscription shall be applicable to the Rights Issue.

In the event the minimum subscription is not received, the Company shall refund the entire application monies received, in accordance with Regulation 86(2) of the SEBI ICDR Regulations, forthwith and in any case not later than four (4) days from the date of closure of the Rights Issue.

#### ALLOTMENT OF THE COMPANY TO ALLOT THE UNDER-SUBSCRIBED PORTION OF THE RIGHTS ISSUE TO ANY SPECIFIC INVESTOR(S)

The under-subscribed portion of the Issue may be allotted to any specific investor(s) recognized by the Company. Name(s) of the specific investor(s), if any, shall be disclosed in a public advertisement two days prior to the Issue Opening Date.

### INTERNAL RISK FACTORS

#### **1. Sustained negative cash flow could adversely impact our business growth, financial condition, and results of operations.**

Our Company has negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

*(Amt. in Lakhs)*

Particulars	For year ended			
	March 31, 2026	March 31, 2025	March 31, 2024	March 31, 2023
Net Cash from Operating Activities	-3,536.81	19,558.08	1,479.09	7,296.28
Net Cash used in Investing Activities	-4,882.36	-86.38	72.87	-77.39
Net Cash used in Financing Activities	8,242.61	-17,541.00	96.24	-6,786.76

Cash flow of a Company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flow in future, it may adversely affect our business and financial operations.

#### **2. There may be potential conflicts of interest of our Parent Company are involved in same business activities that compete with or are in the same line of activity as our business operations.**

Certain group companies/entities associated with Eagle Group are engaged in business activities that are similar to those conducted by our Company. Our company has entered into, and expects to continue entering into, various transactions with this group. However, Eagle Group is not a promoter of our company. Consequently, we cannot guarantee that the interests of these group companies will not conflict with those of our Company. Any such present or future conflicts of interest could materially impact our reputation, business operations, financial condition, and profitability.

**3. An adverse judgment has been passed against our Company in a material litigation matter, which has resulted in liabilities for the Company and may materially and adversely affect our business, financial condition, reputation and results of operations.**

At the time of filing the Draft Letter of Offer, the Company, through its Resolution Professional, had preferred an appeal before the Hon'ble National Company Law Appellate Tribunal, Principal Bench, New Delhi ("NCLAT"), challenging the order dated November 27, 2025, passed by the Hon'ble National Company Law Tribunal, Ahmedabad Bench ("NCLT"). The appeal sought, inter alia, setting aside of the NCLT order and restoration of amounts aggregating to ₹12.09 crores, comprising adjustment of a security deposit amounting to ₹8.30 crores and adjustment of ₹3.79 crores towards pre-CIRP electricity dues.

Subsequently, prior to the filing of this Letter of Offer, the Hon'ble NCLAT passed its final order in the said appeal, which was adverse to the Company's interests. As a result, the Company did not obtain the reliefs sought and may now be required to bear the financial consequences arising from both the impugned order and the appellate decision. This adverse outcome may materially and adversely affect the Company's business, financial condition, cash flows, profitability, reputation, and results of operations. In addition, the Company may incur further costs and expenses if it pursues any other legal remedies available under applicable law. There can be no assurance that any such further proceedings, even if initiated, will result in a favourable outcome for the Company.

**4. We are substantially dependent on third-party suppliers for key raw materials, and any disruption in their supply or significant fluctuation in prices could adversely affect our operations, profitability, and financial condition.**

We are operating a highly integrated manufacturing facility from polymerisation to finished yarns remains significantly dependent on external suppliers for its primary raw materials, namely Purified Terephthalic Acid (PTA) and Mono-Ethylene Glycol (MEG), which are the basic petrochemical inputs required for producing polyester chips and subsequently all downstream polyester yarns and products.

We do not currently have its own captive PTA or MEG manufacturing facility and does not maintain long-term fixed-price or fixed-quantity supply contracts with all of its raw material suppliers. Consequently, we are exposed to risks relating to availability, pricing volatility, and quality consistency of these critical inputs. PTA and MEG prices are directly linked to global crude oil and petrochemical prices and are subject to significant fluctuations. Any sharp increase in raw material prices that cannot be immediately passed on to customers may adversely affect our gross margins.

Further, supply disruptions arising from plant shutdowns of major global or domestic PTA/MEG producers, logistical bottlenecks, port delays, geopolitical tensions, export restrictions imposed by producing countries, force majeure events at supplier plants, or transportation constraints could lead to raw material shortages. Such shortages may force the Company to curtail production, resulting in under-utilisation of its polymerisation, POY, FDY, and texturizing capacities at the Surat plant.

In the event of prolonged non-availability or unaffordable pricing of PTA and MEG, and if the Company is unable to secure alternative sources on commercially viable terms in a timely manner, it may lead to loss of production days, inability to fulfil customer orders, erosion of market share, penalty payments, damage to customer relationships, and a material adverse impact on revenue, EBITDA, and overall profitability.

Although the Company endeavours to maintain relationships with multiple suppliers and keeps strategic inventory, there can be no assurance that such measures will fully mitigate the risks associated with third-party raw material dependency in the future.

**5. The Company is highly dependent on a few customers for a significant portion of its revenue. Loss of one or more of these major customers or a substantial reduction in their orders could adversely affect our business, profitability and results of operations.**

We sell our products i.e. Polyester Chips (Textile Grade), Partially Oriented Yarn (POY), Fully Drawn Yarn (FDY), Texturized Yarn, Dope-Dyed Yarn, Cationic Yarn and other Value-Added Yarns to a large number of domestic customers comprising weavers, texturisers, fabric manufacturers and traders. However, a significant portion of our total revenue is contributed by a limited number of customers.

Although the Company has maintained long-standing business relationships with most of these customers, we generally do not enter into long-term or exclusive sales agreements with them. Our sales are primarily made on purchase order basis and there is no commitment on the part of these customers to continue to place orders with us at historical levels or on similar commercial terms.

Particulars	2025-2026		2024-2025		2023-2024		2022-2023	
	Revenue from customer	% of total Revenue	Revenue from customer	% of total Revenue	Revenue from customer	% of total Revenue	Revenue from customer	% of total Revenue
Revenue from top 5 customers (Amount in lakhs)	97,239.13	92.57	87,585.35	87.29	98,561.47	100	96,433.85	92.34

Any loss of one or more of these major customers, significant reduction or cancellation of their orders, delay in payments, shift to competitors, or adverse change in their business or financial condition may materially affect our revenue, capacity utilisation and cash flows.

Since our integrated manufacturing facility at Surat operates on a continuous basis with substantial fixed overheads, any sharp drop in offtake from key customers without corresponding replacement orders would lead to lower capacity utilisation, inventory pile-up and pressure on operating margins.

However, to mitigate this risk, the Company continuously endeavours to broaden its customer base across different regions and market segments, develop new value-added and specialty yarns to attract new customers, participate in textile exhibitions, and strengthen relationships with existing customers through consistent quality, timely delivery and competitive pricing.

**6. Significant dependence on the textile and apparel sector for a major portion of our sales exposes us to industry-specific risks that could adversely affect our business, results of operations, and financial condition**

We derive substantially all of its revenue from the manufacture and sale of polyester filament yarns, dope-dyed yarns, cationic yarns, micro-filament yarns, and textile-grade PET chips, which are primarily consumed by the textile and apparel industry.

The downstream demand for our products is directly linked to the performance and growth of the textile sector in India and in our export markets. Any slowdown, contraction, or structural challenges in the textile and apparel industry whether caused by reduced consumer spending, shift in fashion trends, increased preference for natural fibres, higher cotton availability leading to substitution of polyester, imposition of anti-dumping duties or trade restrictions on synthetic yarns/textiles, labour issues in weaving/power-loom clusters, or policy changes affecting textile exports could result in lower off-take of our yarns and chips.

Since the textile sector continues to account for the overwhelming majority of our sales any adverse development affecting this single end-user industry would have a direct and material impact on our capacity utilisation, pricing power, inventory levels, revenue, and profitability.

Although the Company is expanding its FDY capacity to produce value-added and specialty yarns with a view to partially diversify its product mix and explore niche technical-textile applications, the bulk of the expanded capacity will continue to serve the conventional textile value chain. There can be no assurance that such diversification efforts will significantly reduce our dependence on the textile sector in the near to medium term.

**7. Our raw material supplies are subject to seasonal disruptions and volatility, which may adversely affect our production, costs and financial performance**

The supply of key raw materials such as Purified Terephthalic Acid (PTA) and Mono Ethylene Glycol (MEG), which are petrochemical feedstocks essential for PET chips production and polymerization in our polyester yarn manufacturing, can be influenced by seasonal factors including monsoons, adverse weather conditions and logistical challenges that impact crude oil refining and derivatives transportation in India. These disruptions often do not align with our steady and continuous production demand at the integrated Karanj facility, leading to potential mismatches in inventory levels and operational continuity. As a result, any inaccuracies in forecasting raw material availability or demand for our products could negatively impact our business performance, operational results and financial health.

Seasonal logistics delays, particularly during the monsoon season, may affect the timely availability and quality of PTA and MEG inputs required for producing POY, FDY and texturised yarns, thereby heightening supply chain vulnerabilities. Variations in global petrochemical pricing, feedstock availability due to international supply chain issues, or domestic transportation bottlenecks can lead to temporary shortages, increased procurement costs or the need for alternative sourcing at higher prices.

Our ongoing expansions and capacity enhancements also demand precise demand forecasting to avoid underutilization of new lines or excess inventory buildup. Inadequate storage facilities, transportation delays or improper handling of raw materials could lead to degradation in quality or consistency, hindering our ability to fulfill customer orders for value-added products such as cationic, dope-dyed or micro-filament yarns, and ultimately pressuring revenue and margins.

However, we continuously endeavour to mitigate these risks by maintaining strategic buffer stocks of critical raw materials, diversifying our supplier base across multiple geographies, investing in weather-resilient logistics partnerships and enhancing forecasting accuracy through advanced inventory management systems and market intelligence, so as to ensure stable supply and minimize cost volatility.

**8. The supply of inputs sensitive to seasonality, such as petrochemical feedstocks for PET chips and polymerization in polyester yarn production, is influenced by seasonal variations like monsoons or weather impacting crude oil derivatives and often does not align with the steady demand for our products. As a result, any inaccuracies in forecasting product demand could negatively impact our business performance, operational results, and financial health.**

The supply of inputs sensitive to seasonality, such as petrochemical feedstocks for PET chips and polymerization in polyester yarn production, is influenced by seasonal variations like monsoons or agricultural cycles impacting crude oil derivatives, often misaligning with steady demand for our products. As a result, inaccuracies in forecasting product demand could negatively impact business performance, operational results, and financial health at integrated Karanj facility.

Seasonal disruptions in raw material quality or availability, such as logistics delays during monsoon season affecting POY, FDY, and texturized yarn inputs, heighten supply chain vulnerabilities. Variations in feedstock yields or global petrochemical pricing can lead to shortages, compounded by reliance on captive power, if fuel logistics falter seasonally.

Ongoing expansions, demand precise forecasting to avoid capacity underutilization from these mismatches. Inadequate storage, transportation delays, or handling could degrade inventory consistency, hindering customer orders for cationic, dope dyed, or micro filament yarns and pressuring revenue and margins. Supply chain enhancements aim to mitigate cost volatility and financial risks.

The supply of key raw materials used in our polyester yarn manufacturing operations is also subject to seasonal and market-driven fluctuations that may not always align with product demand. Inputs such as petrochemical derivatives, including PTA and MEG used in PET chip and polyester yarn production, may experience supply constraints or price volatility due to seasonal logistics disruptions, refinery maintenance cycles, or fluctuations in crude oil markets. Such variations can affect the availability, quality, and cost of raw materials required for the production of POY, FDY, texturized, cationic, dope dyed, and micro filament yarns. Any mismatch between raw material availability and customer demand may lead to production inefficiencies, increased procurement costs, or delays in fulfilling customer orders, which could adversely impact operational performance, margins, and overall financial results.

Inputs are not perishable but it degraded in long time or inconsistency in product availability if not properly handled. Any inaccuracies in forecasting demand or disruptions in sourcing, storage, or transportation could impact our ability to meet customer orders, thereby affecting our revenue and margins. Additionally, factors like inadequate storage facilities, transportation delays, or poor handling practices further exacerbate the risk of product quality loss or supply chain disruptions. These challenges could lead to significant fluctuations in costs and margins, negatively impacting our financial performance, despite ongoing efforts to enhance supply chain management and forecasting accuracy.

**9. Technical failures, breakdowns, or under-performance of our manufacturing plants and machinery could lead to production losses, warranty claims, customer disputes, and materially adverse effects on our operations, reputation, and profitability.**

We operate a capital-intensive, continuous-process, integrated polyester filament yarn manufacturing facility at Karanj, comprising a 1,00,000 TPA continuous polymerisation plant, multiple POY and FDY spin-draw lines, high-speed texturizing machines, dope-dyeing systems, TFO twisting units, and captive power generation. The entire plant runs 24×7, and any technical failure or breakdown of critical imported machinery sourced primarily from Germany, China and other reputed OEMs can cause significant production interruption, lower recovery, higher process waste, and off-spec production of POY, FDY, texturized, dope-dyed, cationic, micro-filament, and carpet yarns.

Such failures may arise from spinneret or spin-pack clogging, godet or winder malfunctions, texturising heater or friction disc issues, catalyst or heat-exchanger problems in the polymerisation section, or unplanned outages in captive power generation, leading to costly reliance on grid power or complete plant shutdown. Despite rigorous in-house quality testing, there is no absolute assurance that the yarn will perform flawlessly under varying processing conditions at customers’ weaving, knitting, or dyeing units.

The Company extends quality assurances and limited warranties covering physical and performance parameters, and any large-scale deviation or rejection may require replacement of material, credit notes, compensation for downstream losses, or sorting and transportation costs at the Company’s expense, thereby resulting in substantial financial liability and damage to customer relationships.

Furthermore, the ongoing FDY capacity expansion carries additional risks of commissioning delays, initial teething troubles, or failure to achieve targeted efficiency and quality levels, which could delay the realisation of benefits from the new investment. Accordingly, prolonged or recurring technical failures, machinery breakdowns, or quality deviations could materially and adversely affect production volumes, capacity utilisation, cost of production, revenue, profitability, and overall financial condition of the Company.

**10. The Company is dependent on a few suppliers for purchases of raw materials. The loss of any of these suppliers may affect our business operations adversely.**

We procure a substantial portion of our major raw materials, particularly Purified Terephthalic Acid (PTA) and Mono Ethylene Glycol (MEG), from a limited number of domestic and international suppliers. Although the Company has maintained long-standing business relationships with most of these suppliers, we do not have long-term or exclusive supply agreements with all of them.

Particulars	2025-2026	2024-2025	2023-2024	2022-2023
-------------	-----------	-----------	-----------	-----------

	Purchase from Supplier	% of total Purchase	Purchase from Supplier	% of total Purchase	Purchase from Supplier	% of total Purchase	Purchase from Supplier	% of total Purchase
Purchase from top 5 Suppliers (Amount in lakhs)	89,924.23	95.35	72,598.22	89.81	76,275.72	77.35	77,802.55	78.88

We cannot assure that these suppliers will continue to supply the required quantity and quality of PTA, MEG and other petrochemical derivatives without interruption and at competitive prices. Any disruption in the supply due to plant shutdowns, force majeure events, geopolitical issues, sharp fluctuations in global crude oil and petrochemical prices, transportation bottlenecks or re-allocation of material by suppliers to other buyers may adversely affect our production schedules, capacity utilization, procurement cost and profitability.

Since our manufacturing process is based on continuous polymerization and requires uninterrupted availability of PTA and MEG for production of Textile Grade Chips, POY, FDY, Texturised Yarns and Value Added Yarns at our integrated plant at Karanj, Surat, any significant delay or shortage in raw material supply or abnormal increase in prices which cannot be passed on to customers would materially affect our revenue and results of operations.

However, to mitigate this risk, the Company continuously endeavours to widen its supplier base, develop alternate sources in different geographies, maintain optimum inventory of critical raw materials and actively qualify new suppliers so as to ensure continuity of supply and reduce dependence on a few suppliers.

#### 11. Our Company has high Employee Attrition, which may Impact Our Performance, Profitability and Financial Results

Our company has experienced a relatively high employee attrition rate. The latest attrition details for April 2026, compared to the previous month, are as given below:

Employee Particulars	April 2026
Opening Count	623
New Joiner	17
Left	22
Remaining	618
<b>Attrition Rate (%)</b>	<b>3.53</b>

Elevated attrition can lead to increased recruitment and training expenses, the loss of experienced talent, and potential delays in project execution, ultimately impacting productivity and service quality. If we are unable to retain or attract skilled employees in the future, it may negatively affect our overall business operations, profitability, and financial results.

#### 12. Non-compliance with applicable laws and regulations, or changes in regulatory framework governing the polyester yarn manufacturing industry, could expose us to significant legal, financial, operational and reputational risks.

We, as an integrated manufacturer of polyester filament yarns, texturised yarns, dope-dyed yarns and textile-grade PET chips with a 1,00,000 TPA continuous polymerisation plant, multiple spinning and texturising lines at Karanj is subject to an extensive framework of central, state and local regulations covering environmental protection, pollution control, industrial safety, hazardous waste management, labour welfare, power generation, foreign trade and corporate governance. Key compliances include strict adherence to Zero Liquid Discharge norms, effluent and air emission standards prescribed by the Gujarat Pollution Control Board under the Water Act, Air Act and Hazardous Waste Rules; regular renewal of consents to establish/operate; compliance with factory, boiler and electrical safety regulations under the Factories Act; timely payment of statutory dues; and maintenance of Star Export House status along with

availing export incentives under Advance Authorisation, Duty Drawback, RoSCTL/RoDTEP and similar schemes.

Any lapse in obtaining or renewing critical environmental consents, failure to meet revised pollution norms, non-compliance with labour or safety laws, or inability to fulfil conditions attached to export benefits could result in imposition of heavy penalties, partial or complete plant shutdown, suspension or cancellation of licences, withdrawal of fiscal incentives, protracted litigation and severe reputational damage. The ongoing FDY capacity expansion further requires amended pollution consents, additional factory approvals and environmental clearances; any delay or refusal in securing these could derail project execution and financial returns.

Moreover, adverse policy changes such as withdrawal or reduction of export incentives, increase in power tariffs, imposition of anti-dumping or safeguard duties on PTA/MEG imports, or introduction of more stringent environmental or energy-efficiency norms could significantly raise operating costs and erode competitiveness. Although the Company has dedicated teams to monitor regulatory developments and ensure timely compliance, there can be no assurance that all present and future requirements will be met without interruption or that regulatory changes will not materially and adversely affect our business, results of operations and financial condition.

**13. The manufacturing units of our Company are concentrated in the state of Gujarat and the inability to operate and grow our business in other regions may have an adverse effect on our business, financial condition, results of operations, cash flows and future business prospects.**

The manufacturing units of our Company are located in the state of Gujarat. Any materially adverse social, political or economic development, natural calamities, civil disruptions, or changes in the policies of the state government or local governments in these regions could adversely affect manufacturing operations and require a modification of our business strategy or require us to incur significant capital expenditure or suspend our operations. Any such adverse development affecting continuing operations at the manufacturing facilities of our Company could result in significant loss due to an inability to meet customer requirements and production schedules, which could materially affect our business reputation within the industry. The occurrence of, or our inability to effectively respond to, any such events or effectively manage the competition in the region, could have an adverse effect on our business, results of operations, financial condition, cash flows and future business prospects

**14. We dependent on our Promoters, Key Managerial Personnel and Senior Management for continued performance and growth. Our inability to retain or replace them in a timely manner may adversely affect our business and results of operations.**

Our Company has been promoted by Shankarlal Somani and his family since its incorporation in 1988. Over the last three decades, our growth from a small polypropylene yarn unit to a fully integrated polyester filament yarn and chips manufacturer has been driven by the vision, technical expertise and entrepreneurial leadership of our Promoters.

Even after the change in management control in July 2024 pursuant to the Hon'ble NCLT approved resolution plan in favour of Egale Group, our continued performance remains dependent on the rich industry experience of the earlier team carried forward, combined with the fresh strategic direction and professional expertise brought in by the new management team of Egale Group, our present Key Managerial Personnel and Senior Management.

Our manufacturing operations involve highly specialised and continuous processes such as polymerization, high-speed spinning (POY & FDY), texturizing, dope-dyeing and production of value-added specialty yarns on sophisticated imported machinery. The knowledge and hands-on experience of our plant heads, production managers, quality control heads, maintenance engineers and marketing team are critical for maintaining high-capacity utilisation, consistent product quality, on-time delivery and cost competitiveness.

The loss of services of any of our Key Managerial Personnel or senior functional heads, and our inability to replace them with equally competent and experienced professionals in a timely manner, could adversely

affect our day-to-day operations, customer relationships, ongoing expansion projects and overall profitability.

Further, we are currently implementing a major capacity enhancement programme for manufacturing value-added synthetic yarns. The successful and timely completion of this project is heavily dependent on the continued availability and performance of our experienced technical and project execution teams.

We also operate in an industry where skilled manpower for polymer processing, operation and maintenance of high-speed German, China and OAM, and product development remains in short supply. Any significant increase in attrition levels or wage costs, or our inability to attract suitable talent, may adversely impact our operational efficiency and growth plans.

We need to maintain sufficient inventory levels to meet customer expectations at all times. Our inability to maintain appropriate levels of inventory to meet the demands of our customers may have an adverse effect on our results of operations and financial condition.

We need to maintain sufficient inventory levels to meet customer expectations at all times. Accumulating excess inventory could increase our inventory costs, and a failure to have adequate inventory in stock to fulfil customer orders could result in inability to meet customer demand or loss of customers.

As actual orders by our customers are only placed by way of on-going purchase orders which are subject to refining/ phasing-out of existing models on an on-going basis, we are exposed to significant or unexpected changes in product specifications and delivery schedules, which may result in a mismatch between our inventories of raw materials and bought out components and of manufactured products, thereby increasing our costs for maintaining inventory.

Our inability to forecast the level of customer demand for our products as well as our inability to accurately schedule our raw material purchases and production and manage our inventory may adversely affect our business and cash flows from operations.

The table below sets forth our inventory as of the dates stated:

<i>(Amount in lakhs)</i>				
Particulars	FY 2025-26	FY 2024-25	FY 2023-24	FY 2022-23
Inventories	13,324.48	10,552.12	10,252.34	10,299.22

While we have not written off any inventory or experienced a significant mismatch in the past, there can be no assurance that such instances in the future will not have a material adverse effect on our liquidity, profitability and financial condition. Furthermore, we may be required to maintain high inventory levels if we anticipate increase in customer demand for our products, which in turn would require a significant amount of working capital. Continued increases in our working capital requirements may have an adverse effect on our results of operations and financial condition.

**15. The Company is dependent on a few key debtors for a substantial portion of its accounts receivable. Any default, delay in payment, or deterioration in the financial health of these debtors may adversely affect our cash flow, liquidity, and financial position.**

Our business involves extending credit terms to customers for the sale of products such as Polyester Chips, Partially Oriented Yarn, Fully Drawn Yarn, Texturised Yarn, Dope-Dyed Yarn, Cationic Yarn, and other Value-Added Yarns. While we serve a diverse range of domestic customers including weavers, texturisers, fabric manufacturers, and traders, a significant share of our outstanding receivables is often concentrated among a limited number of large debtors.

We typically do not secure long-term payment guarantees or collateral from these debtors, and our credit sales are based on standard trade terms, purchase orders, and historical relationships. There is no assurance that these debtors will continue to meet their payment obligations promptly or in full, especially in the event of economic downturns, industry disruptions, or changes in their business operations.

Particulars	2025-2026	2024-2025	2023-2024	2022-2023
-------------	-----------	-----------	-----------	-----------

	Receivables	% of total Receivables	Receivables	% of total Receivables	Receivables	% of total Receivables	Receivables	% of total Receivables
Top ten Trade Receivables (Amount in lakhs)	13,306.04	100.00	8,392.22	100.00	8,202.06	100.00	10,478.23	100.00

Any default by one or more of these key debtors, significant delays in collections, or the need to write off bad debts could adversely affect our working capital, increase provisioning requirements, and strain our financial resources. Additionally, if these debtors face insolvency, legal disputes, or operational challenges, it may lead to prolonged recovery processes or irrecoverable losses.

Our integrated manufacturing facility requires consistent cash inflows to manage ongoing operations, raw material procurement, and overheads. A concentration of receivables with few debtors heightens the risk of liquidity shortages if payments are disrupted, potentially forcing us to seek alternative financing at higher costs.

To mitigate this risk, the Company primarily conducts sales of its products through dealers appointed by the Company. By working with an established dealer network, the Company manages its credit exposure more effectively and ensures better control over collections. The Company maintains regular communication with its dealers, monitors their payment performance, and periodically reviews credit limits based on their payment history and prevailing market conditions. This approach helps in reducing the risk associated with receivables while ensuring smooth distribution of the Company's products.

**16. Our Company is highly leveraged. Inability to service our debt obligations, comply with restrictive covenants or obtain additional funding on acceptable terms may materially affect our business, financial condition and results of operations.**

We continue to have substantial outstanding borrowings from banks and financial institutions. These borrowings have been primarily utilized for funding various capacity expansion projects, installation of captive power plants, meeting working capital requirements and for bridging cash losses in earlier years. Although a large portion of the earlier unsustainable debt has been settled/written down pursuant to the Hon'ble NCLT approved resolution plan dated 16th July 2024 implemented by Egale Group, we continue to remain leveraged and are required to service the restructured/sustainable debt and comply with various financial and operative covenants stipulated by our lenders.

Any failure on our part to service the principal or interest obligations in a timely manner, or to maintain the prescribed financial ratios and security coverage, or to adhere to other restrictive conditions, may result in an event of default leading to levy of penal interest, acceleration of loans, invocation of securities and enforcement of corporate/personal guarantees. Further, since a significant portion of our borrowings is at floating rates linked to repo rate, any sharp rise in interest rates will increase our finance costs and adversely impact profitability.

In case we are unable to generate sufficient operating cash flows, refinance existing debt on favourable terms or raise additional debt/equity funding when required, it may adversely affect our liquidity position, restrict future growth plans and constrain our ability to meet debt servicing obligations.

However, post implementation of the resolution plan under the new management of Egale Group, we have a significantly cleaner and sustainable balance sheet, restructured debt with longer repayment tenure and lower interest rates, restored banking relationships and stronger financial discipline. We are also focused on improving capacity utilisation, shifting product mix towards higher-margin value-added yarns, reducing power and conversion costs and generating healthy operating cash flows, which will enable us to comfortably service our debt obligations and progressively deleverage the balance sheet in the coming years.

**17. The Company relies on a few key creditors for a significant portion of its raw material and input requirements. Any disruption in supply from these major creditors, price volatility, or unfavorable changes in terms could adversely impact our production, cost structure, and operational efficiency.**

We procure essential raw materials and inputs, such as purified terephthalic acid, monoethylene glycol, and other chemicals, from a broad network of domestic and international suppliers to support the manufacturing of our products including Polyester Chips, Partially Oriented Yarn, Fully Drawn Yarn, Texturised Yarn, Dope-Dyed Yarn, Cationic Yarn, and other Value-Added Yarns. However, a substantial part of our total procurement value is sourced from a limited number of key creditors.

Although we have established long-term relationships with most of these suppliers, our purchases are generally made on a purchase order basis without long-term or exclusive supply agreements. There is no guarantee that these creditors will continue to supply materials at current volumes, prices, or quality levels, particularly if they encounter production issues, regulatory changes, or shifts in their business priorities.

Particulars	2025-2026		2024-2025		2023-2024		2022-2023	
	creditors	% of total creditors	creditors	% of total creditors	creditors	% of total creditors	creditors	% of total creditors
Top ten Trade Payables (Amount in lakhs)	13,570.73	93.47	12,581.87	95.05	2,294.61	43.47	1,667.79	43.42

The loss of one or more major creditors, sudden supply shortages, delays in deliveries, or imposition of higher prices could lead to production halts, increased costs, and reduced profitability. Furthermore, if these suppliers experience financial distress, geopolitical tensions, or supply chain disruptions, it may force us to source alternatives at short notice, potentially on less favorable terms.

Given that our manufacturing operations run continuously with high fixed costs, any interruption in raw material supply from key creditors could result in underutilization of capacity, inventory shortages for finished goods, and inability to meet customer commitments, thereby affecting sales and market reputation.

To address this risk, the Company strives to expand its supplier network across geographies, qualify alternative sources for critical inputs, negotiate favorable terms through bulk purchasing, and maintain strategic inventory buffers. We also participate in industry forums, monitor supplier performance, and invest in backward integration where feasible to enhance supply chain resilience.

**18. We intend to utilise a portion of the Net Proceeds for funding our capital expenditure requirements. We are yet to place orders for 100% of the solar power plant, as specified in the Objects of the Issue chapter. Any delay in procurement of such solar power system may delay the schedule of implementation and may also lead to increase in cost of this solar power system, further affecting our revenue and profitability.**

Although we have identified the installation of solar power plant required. However, we are yet to place orders for 100% installation of solar power plant worth ₹ 2,200.00 Lakhs as detailed in the “*Objects of the Issue*” on page no 61 of this offer document. We have not entered into any definitive agreements to utilize the Net Proceeds for this object of the issue and have relied on the quotations received from third parties for estimation of the cost. While we have obtained the quotations from various vendors in relation to such capital expenditure, most of these quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors. We cannot assure you that we will be able to undertake such capital expenditure within the cost indicated by such quotations or that there will not be cost escalations. Delay in procurement of the same can cause time and cost overrun in the implementation of our proposed expansion and can also compel us to buy the same at a higher price, thus causing the budgeted cost to vary. As a result, our business, financial condition, results of operations and prospects could be materially and adversely affected.

**19. Our products are subject to frequently changing customer preferences, specifications and fashion trends. Our inability to accurately anticipate or quickly adapt to such changes may adversely affect our business and profitability.**

The synthetic textile industry is highly fashion-driven and customer requirements with respect to denier, lustre, cross-section, dyeability, functional properties, colour shades and yarn types keep changing rapidly. Our customers comprising weavers, knitters, fabric processors and garment manufacturers frequently demand new and innovative products such as dope-dyed yarns, cationic-dyeable yarns, bright/trilobal FDY, micro-filament yarns, high-tenacity yarns and other value-added specialty yarns to meet the evolving needs of the apparel, home-textile and technical-textile segments.

Our inability to correctly forecast emerging trends, develop new products in time or modify existing lines as per latest customer specifications may result in lower offtake, pile-up of slow-moving or non-moving inventory, forced discounting and erosion of margins. Conversely, delay in introducing new value-added products may lead to loss of customers to more agile competitors.

We rely on continuous market feedback, close interaction with existing customers, participation in textile fairs and in-house product development efforts to identify upcoming trends and introduce new varieties.

However, there can be no assurance that our judgement regarding future demand will always be accurate or that we will be able to develop and commercialise new products within the desired time frame and at competitive costs.

We are currently expanding our capacity to manufacture value-added and specialty yarns. The success of this expansion will largely depend on our ability to correctly anticipate market requirements and produce yarns that meet the exacting quality and performance standards of customers.

However, we continuously strive to mitigate this risk by maintaining a dedicated product development cell, investing in latest testing and trial facilities, strengthening our marketing and technical service teams, and regularly launching new variants of dope-dyed, cationic, bright, trilobal and functional yarns so as to broaden our product portfolio, reduce dependency on standard products and stay ahead of changing customer preferences.

**20. Limited operating history under the new management and recent change in control may not serve as an adequate basis to evaluate our future prospects, results of operations, and cash flows.**

The management and control of Sumeet Industries Limited was taken over by M/s Egale Group pursuant to the resolution plan approved by the Hon'ble National Company Law Tribunal (NCLT), Ahmedabad Bench, vide its order dated 16-07-2024. Consequently, the Company has a very limited operating history under the current management and ownership structure.

Although the Company itself has been in existence since 1988 and has a long track record of manufacturing polyester and polypropylene yarns, the recent change in control through the Corporate Insolvency Resolution Process (CIRP) marks a significant shift in strategic direction, management team, governance practices, operational priorities, and financial structure. The new parent has limited prior experience of managing and operating the Company's existing integrated manufacturing facility at Karanj, Surat, which encompasses the entire value chain from polymerisation to partially oriented yarn (POY), fully drawn yarn (FDY), texturised yarn, dope-dyed yarn, cationic yarn, micro-filament yarn, and textile-grade PET chips.

Given the very short operating track record of the Company under the present ownership and management (less than 18 months), historical financial and operational performance prior to the takeover may not be fully representative of future performance. The limited post-resolution operating history may therefore not provide an adequate basis for investors to evaluate our future prospects, results of operations, cash flows, ability to successfully integrate and execute the ongoing expansion, or the long-term sustainability of the turnaround strategy implemented under the approved resolution plan. Accordingly, period-to-period comparisons of our operating results, particularly those including periods before and after the change in control, should not be relied upon as an indication of our future performance.

**21. We have entered into certain transactions with related parties. These transactions or any future transactions with our related parties could potentially involve conflicts of interest.**

We have entered into certain transactions with related parties and may continue to do so in future. For further details, please see the section titled “*Financial Information*” on page no. 79. Our Company has entered into such transactions due to easy proximity and quick execution. Additionally, our Company believes that all our related party transactions have been conducted on an arm’s length basis and were/are in compliance with all applicable laws and regulations for the time being in force. Our Company may enter into such transactions in future also and we cannot assure that in such events there would be no adverse effect on results of our operations, although going forward, all related party transactions that we may enter will be subject to board or shareholder approval, as under the Companies Act, 2013 and the SEBI LODR Regulations.

**22. Our business is working-capital intensive and any discontinuation, reduction or delay in availability of adequate working capital limits on favourable terms may adversely affect our operations, profitability and growth prospects.**

We have a continuous polymerization plant manufacturing polyester chips, POY, FDY, texturized yarns and value-added specialty yarns. The nature of our business requires maintenance of substantial working capital on an ongoing basis primarily due to high inventory levels of raw materials (PTA & MEG) to guard against price volatility and supply disruptions, and for holding adequate stock of finished goods to meet timely delivery commitments to customers. Accordingly, a significant portion of our total borrowing limits comprises fund-based and non-fund-based working capital facilities from banks..

Any delay in renewal or assessment of limits, reduction in sanctioned amounts, increase in margin or interest rates, imposition of stricter conditions, or delayed/non-disbursement of sanctioned facilities may create liquidity constraints, force us to curtail production, delay dispatches or resort to costlier sources of funds. Inability to finance our day-to-day working capital requirements adequately and in a timely manner would hamper smooth operations, restrict sales growth and adversely impact on our profitability.

However, we continuously endeavor to optimize working capital usage by improving inventory turnover ratios, close monitoring of receivables, negotiating favorable terms with suppliers and customers, and maintaining strong banking relationships so as to ensure uninterrupted availability of adequate working capital at competitive costs.

**23. Our inability to obtain, renew or maintain statutory and regulatory permits, licenses and approvals required for our manufacturing operations may have a material adverse effect on our business, results of operations and financial condition.**

We are engaged in the continuous manufacturing of polyester chips, POY, FDY, Texturized yarns and value-added synthetic yarns at our integrated plant at Karanj, Surat. Our operations require us to obtain and keep in force various statutory and regulatory approvals, licenses, registrations and permissions under environmental, factories, labour, fire safety, electricity, pollution control, explosive, weights & measures and other applicable laws. These include, among others, Consent to Establish and Consent to Operate from GPCB, Factory License, hazardous waste authorisation, fire NOC, boiler licenses, electrical approvals and periodic calibrations.

Many of these approvals are granted for a limited duration and need to be renewed from time to time. Some approvals also contain certain conditions that we are required to comply with on an ongoing basis. There can be no assurance that the relevant authorities will renew such approvals in a timely manner or at all, or that we will continue to satisfy all prescribed conditions. Any delay, refusal or imposition of onerous conditions at the time of renewal may force us to temporarily suspend or curtail plant operations.

Further, changes in environmental or pollution control norms, introduction of stricter emission or effluent standards, or amendments in applicable laws may require us to incur substantial additional capital expenditure or operating costs to upgrade our facilities. Failure to comply with existing or new regulatory

requirements may attract heavy penalties, prosecution, revocation of licenses or even closure of the plant by the authorities.

**24. Our funding requirements and the proposed deployment of Net Proceeds have not been appraised by a public financial institution or a scheduled commercial bank and our management will have broad discretion over utilization of the Net Proceeds.**

Our Company proposes to utilize the Net Proceeds for 19,475.11 lakhs. Our proposed deployment of Net Proceeds has not been appraised by a public financial institution or a scheduled commercial bank and is based on management estimates.

**25. Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure (“ASM”) and Graded Surveillance Measures (“GSM”) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.**

SEBI and the Stock Exchanges, in order to enhance market integrity and safeguard the interests of investors, have introduced various pre-emptive surveillance measures. These measures are intended to alert and advise investors to exercise caution while dealing in securities and to require market participants to conduct necessary due diligence. Such measures include, inter alia, the Graded Surveillance Measure and the Additional Surveillance Measure, which are imposed based on objective parameters such as price and volume variation, volatility, market capitalization, trading activity and other surveillance concerns.

As on the date of this Offer Document, the Equity Shares of the Company are placed under ASM LT Stage I on both the stock exchanges. ASM LT Stage I entails enhanced regulatory and surveillance restrictions, which may include, inter alia, requirement of higher margins, settlement of trades on a trade-for-trade basis without netting off, limitation on trading frequency, and price band restrictions, as may be prescribed by the Stock Exchanges from time to time. Further, the Equity Shares are displayed on the surveillance dashboards of the Stock Exchanges, which may impact investor perception and trading activity.

On listing, and thereafter, the market price and trading volume of our Equity Shares may be subject to significant fluctuations due to general market conditions, volatility in Indian and global securities markets, our financial performance, performance of competitors, changes in investor sentiment, or political, economic and regulatory developments. The continued applicability of ASM LT Stage I or any further surveillance action by SEBI or the Stock Exchanges may restrict trading liquidity in our Equity Shares.

The imposition and continuation of ASM LT Stage I restrictions may have an adverse effect on the market price, trading volume and liquidity of our Equity Shares and may disrupt the development of an active and liquid market for our Equity Shares. There can be no assurance as to when or whether the Equity Shares will be moved out of ASM LT Stage I and investors may face difficulty in buying or selling the Equity Shares during the period such surveillance measures remain in force.

**26. Our inability to raise further capital or additional debt on acceptable terms may adversely affect our business, results of operations and financial condition. Further, adverse movement in interest rates may impact our finance costs and profitability.**

We require substantial working capital for our day-to-day operations in polyester yarn and chips manufacturing, including procurement of raw materials, maintenance of inventory levels, and meeting operational expenses. Our ability to fund such working capital requirements depends upon adequate internal accruals and timely availability of additional debt or equity funding from banks, financial institutions or capital markets.

Our capacity to obtain fresh funding and the cost of such funding are influenced by several factors including our financial performance, credit ratings, prevailing economic and money-market conditions, lending policies of banks towards the textile sector, and general investor sentiment. There can be no assurance that we will always be able to raise additional finance when required, or that such finance will be available on commercially acceptable terms.

A substantial portion of our existing and future borrowings carry floating interest rates. Any sharp upward movement in interest rates will increase our interest outflow, thereby reducing net profit margins and cash flows.

In the event of breach of financial or other covenants contained in our loan agreements, lenders may levy penal interest, accelerate repayment schedules, enforce securities or declare an event of default. Such actions could restrict our liquidity, force distress sale of assets or limit our ability to raise further funds. During any period of default, fresh financing or refinancing may become available only at significantly higher costs and with more restrictive conditions.

However, we continuously monitor our funding requirements, maintain healthy relationships with multiple banks and financial institutions, and strive to improve profitability and credit profile so as to ensure continued availability of funds at competitive rates for meeting our operational and debt repayment objectives.

**27. Our Promoters have provided personal guarantees in connection with our borrowings. Our business, financial condition, results of operations and prospects may be adversely affected by the revocation of all or any of the guarantees provided by them in connection with our borrowings.**

Our Promoters have provided personal guarantees in connection with certain of our financing arrangements. There can be no assurance that our Promoters will continue to provide such personal guarantees for our debt facilities in the future or that our lenders will continue to extend our current or comparable financing arrangements in the absence of such personal guarantees from our Promoters. Our ability to service our debt obligations will depend entirely on the cash flow generated by our business in the future. In addition, in the event that any personal guarantees provided by our Promoters are invoked and the Promoters are not able to meet their guarantees' requirements, then legal proceedings may be initiated against them, and they may not be able to effectively manage the operations of our Company.

**28. Any inadequacy or lapse in our internal control systems may have an adverse effect on our business, results of operations and financial condition.**

We are responsible for establishing and maintaining adequate internal control measures commensurate with the size and complexity of our operations. Our internal audit functions are equipped to make an evaluation of the adequacy and effectiveness of internal controls on an ongoing basis to ensure that business units adhere to our policies, compliance requirements and internal control guidelines. We are exposed to operational and financial risks arising from the potential inadequacy or failure of internal processes or systems in our polyester yarn and chips manufacturing business, and our actions may not be sufficient to guarantee effective internal controls in all circumstances. Given the size of our operations, it is possible that errors may repeat or compound before they are discovered and rectified. Our management information systems and internal control procedures that are designed to monitor our operations and overall compliance may not identify every instance of non-compliance or every suspicious transaction. If internal control weaknesses are identified, our actions may not be sufficient to correct such internal control weakness.

For example, in our polyester manufacturing operations, a failure in internal controls may lead to errors in raw material inventory management (PTA & MEG), production inefficiencies due to machinery breakdowns, quality deviations in POY/ FDY/ Texturized yarns, or inaccuracies in captive power consumption tracking. Such failures could result in financial misstatements, delayed order fulfilment, increased costs, or discrepancies in customer or regulatory data, all of which could adversely affect our business operations and customer relationships.

Failures or material weaknesses in internal controls may lead to incidents of fraud.

We cannot assure you that we will be able to prevent frauds in the future or that our existing internal mechanisms to detect or prevent fraud will be sufficient. Any fraud discovered in the future may have an adverse effect on our reputation, business, cash flows, results of operations and financial condition.

**29. Our business may suffer significant harm if we cannot secure and maintain intellectual property rights over the Company's name.**

Our Company operates under the name & logo "**Sumeet**", which is currently not registered as a trademark in the name of our Company. While we have intend to apply for registration of our Company's name and logo with the relevant trademark authorities, there is no assurance that such registration will be granted. If we are unable to secure trademark registration for the name "Sumeet" under the applicable class, our Company may not be able to effectively enforce or protect its intellectual property rights in respect of its trade name and brand identity. In the absence of a registered trademark, our Company may be unable to avail itself of the statutory protections available under the Trademarks Act, 1999, which are ordinarily granted to registered trademark holders. This could have a significant adverse impact on our business, reputation, and goodwill, and may in turn negatively affect our operational and financial results.

Furthermore, there exists a risk that a third party may apply for and obtain trademark registration for the same name and/or style under the relevant class of goods or services. In such an event, our Company's continued use of the name could be legally challenged by such third party, potentially restricting or restraining our ability to operate under our existing trade name. This could lead to rebranding costs, loss of brand recognition, disruption to business operations, and damage to our established reputation and goodwill. It is pertinent to note that while our Company does hold a registered trademark for the name "SIMILON" in Class 23 since 1993 for the sale of its products, the said registration does not extend to or cover the trade name "Sumeet". Accordingly, the protections afforded under the SIMILON trademark registration cannot be relied upon to safeguard our rights in the name of the Company.

**30. Our Directors and Promoters are interested in our business apart from reimbursement of expenses incurred or normal remuneration or benefits.**

Our Directors and Promoters may be interested in our business, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company and in relation to certain transactions entered into with our Promoters. We cannot assure you that such Directors or Promoters will exercise their rights as shareholders to the benefit and best interest of our Company.

**31. We do not have long-term commitments with our customers and our customers may terminate contracts before completion, negotiate adverse terms of the contract or choose not to renew contracts, which could materially adversely affect our business, cash flows, financial condition and results of operations.**

A substantial portion of our revenues is generated from repeat business. Our engagements with our customers are typically for projects that are singular in nature. Even if we successfully deliver contracted services and maintain close relationships with our customers, several factors outside of our control could cause the loss of reduction in business or revenue from our existing customers. These factors include, among other things:

- The business or financial condition of that customer or the economy;
- Changes in the personnel at our customers who are responsible for procurement or with whom we primarily interact;
- A demand for price reductions by that customer;
- Mergers, acquisitions or significant corporate restructurings involving that customer;
- A decision by that customer to move work in-house or to one or several of our competitors.

**32. We face competition in our business from domestic competitors. Such competition would have an adverse impact on our business and financial performance.**

The industry in which we operate is highly and increasingly competitive due to presence of many players in sector. Our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

**33. Our Company is dependent on third party transportation providers for the delivery of our goods and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations.**

Our Company uses third party transportation providers for delivery of our goods. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on our business. In addition, goods may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delays in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our raw materials may have an adverse effect on our business and results of operations.

Further, disruptions of transportation services due to weather-related problems, strikes, lockouts, inadequacies in the road infrastructure, or other events could impair ability to procure raw materials on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

**34. The Company has suffered a loss of approximately ₹12.09 crores pursuant to the final adjudication of a dispute with Dakshin Gujarat Vij Company Limited, which has adversely impacted, and may continue to adversely impact, our financial position, liquidity, cash flows and profitability.**

Our Company was involved in a dispute with Dakshin Gujarat Vij Company Limited ("DGVCL") relating to the adjustment of a security deposit amounting to ₹8.30 crores and an amount of ₹3.79 crores towards pre-CIRP electricity dues, aggregating to approximately ₹12.09 crores. The Company had challenged the validity of such adjustments on the ground that they were made in violation of the moratorium imposed under Section 14 of the Insolvency and Bankruptcy Code, 2016. Pursuant to an order dated November 27, 2025, passed by the Hon'ble National Company Law Tribunal, Ahmedabad Bench, the Company's contentions were not accepted. Thereafter, the Company, through its Resolution Professional, preferred an appeal before the Hon'ble National Company Law Appellate Tribunal, Principal Bench, New Delhi, under Section 61 of the Insolvency and Bankruptcy Code, 2016. However, the Hon'ble National Company Law Appellate Tribunal, vide its judgment dated May 25, 2026, dismissed the appeal and upheld the order of the National Company Law Tribunal.

Consequently, the adjustment of the aforesaid amounts aggregating to around ₹12.09 crores has attained finality and the Company is not entitled to any recovery thereof. The loss arising from such adjustment has adversely affected the Company's financial position, liquidity, cash flows and profitability. Any further adverse impact arising from such loss, including any strain on our liquidity, inability to generate sufficient cash flows, constraints on working capital, or deterioration in our financial performance, may materially and adversely affect our business, results of operations, cash flows and financial condition.

**35. Internal or external fraud, dishonesty, or misconduct by our personnel could have a negative impact on our reputation and financial results.**

Misconduct by our employees could bind us to transactions that exceed authorized limits or present unacceptable risks, and our employees could conceal unauthorized or unlawful activities from us. Employee misconduct could also involve front-running in securities markets or the improper use or disclosure of confidential information or non-compliance with insider trading rules, which could result in regulatory sanctions and serious reputational or financial harm.

It is not always possible to deter fraud or misconduct by employees, and the precautions we have taken and the systems we have put in place to prevent and deter such activities may not be effective in all cases. Any instances of fraud or misconduct could adversely affect our reputation, business, results of operations, and financial condition.

**36. Our business is based on the trust and confidence of our customers; any damage to that trust and confidence may materially and adversely affect our business, future financial performance, and results of operations.**

We are dedicated to earning and maintaining the trust and confidence of our customers and we believe that a good reputation is essential to our business. The reputation of our Company could be adversely affected by any threatened and/or legal proceedings and/or any negative publicity or news articles in connection with our Company. As such, any damage to our reputation could substantially impair our ability to maintain or grow our business. If we fail to maintain brand recognition with our target customers due to any issues with our product offerings, a deterioration in service quality, or otherwise, our market perception and customer acceptance of our brands may also decline.

**37. We may not be successful in implementing our business strategies.**

The success of our business depends substantially on our ability to implement our business strategies effectively or at all. Even though we have successfully implemented our business strategies in the past, there is no guarantee that we can implement the same on time and within the estimated budget going forward, or that we will be able to meet the expectations of our targeted customers. Changes in regulations applicable to us may also make it difficult to implement our business strategies. Failure to implement our business strategies would have a material adverse effect on our business and the results of operations.

**38. Any IT system failures or lapses on part of any of our employees may lead to operational interruption, liabilities or reputational harm.**

The success of our businesses depends in part upon our ability to effectively deploy, implement and use information technology systems and advanced technology initiatives in a cost effective and timely basis. Our information technology systems include multiple applications and other systems that allocate resources and facilitate internal and external communications, enabling us to coordinate and make quick decisions across our business. In our customer engagements, we collect, process, store, use, transmit and have access to confidential information. Our computer networks may be vulnerable to unauthorised access, computer hackers, computer viruses, worms, malicious applications and other security problems caused by unauthorised access to, or improper use of, systems by our employees, subcontractors or third-party vendors.

Any systems failure or security breach or lapse on our part or on the part of our employees and other ecosystem participants that results in the release of user data could harm our reputation and brand and, consequently, our business, in addition to exposing us to potential legal liability. Any such legal proceedings or actions may subject us to significant penalties and negative publicity, require us to change our business practices, increase our costs and severely disrupt our business. Interruptions or performance problems associated with our technology and infrastructure may harm our business and results of operations.

**39. Delays or defaults in client payments could result in a reduction of our profits.**

We may be subject to working capital shortages due to delays or defaults in payments by clients. If clients default in their payments in due time to which we have devoted significant resources it could have a material adverse effect on our business, financial condition and results of operations and could cause the price of our Equity Shares to decline.

**40. Potential conflict of interest of the Promoters or directors of the Issuer if involved with one or more ventures which are in the same line of activity or business as that of the Issuer.**

A conflict of interest may occur between our business and the business of such ventures in which our Promoters, our directors and related entities are involved with, which could have an adverse effect on our operations. Conflicts of interest may also arise out of common business objectives shared by us, our Promoters, Directors and related entities. Our Promoters, our directors and related entities may compete with us and have no obligation to direct any opportunities to us. We cannot assure you that these or other conflicts of interest will be resolved in an impartial manner.

**41. Interests of the Promoters, Directors or Key Management Personnel of the Issuer, other than reimbursement of expenses incurred or normal remuneration or benefits. Any portion of the issue**

---

**proceeds that is proposed to be paid by the Issuer to the promoter, directors or key managerial personnel of the Issuer.**

Our Promoters are interested in our Company to the extent of being the Promoters of our Company and to the extent of their shareholding and dividends payable to them, if any. Certain of our Directors and Key Management Personnel may be regarded as interested to the extent of, among other things, remuneration, sitting fee, commission, performance bonus, long term incentives, and other perquisites.

**42. Limited or Sporadic trading of any specified securities of the Issuer on the Stock Exchanges.**

Prior to the Rights Issue, there has been infrequent public market for the Equity Shares and an active public market for the Equity Shares may not develop or be sustained after the Rights Issue. Listing and quotation do not guarantee that a trading market for the Equity Shares will develop or, if a market does develop, the liquidity of that market for the Equity Shares. Although we currently intend that the Equity Shares will remain listed on the Stock Exchanges, there is no guarantee of the continued listing of the Equity Shares. Failure to maintain our listing on the Stock Exchanges or other securities markets could adversely affect the market value of the Equity Shares.

**43. Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.**

Our manufacturing operations at the integrated facility are inherently subject to various risks that may negatively impact our profitability, including fire and explosion hazards in polymerization and spinning units, breakdown or damage to imported high-speed, loss or damage to raw material stocks, finished goods, third-party liability claims, accidents involving plant personnel, and natural disasters such as floods or cyclones affecting the coastal Gujarat region. While we have obtained a comprehensive all-risk insurance policy covering entire plant & office as well as group insurance cover for all employees under a policy. We cannot guarantee that such coverage is adequate or comprehensive against all potential losses, or that premiums will remain affordable in the future.

Any failure to renew these policies on similar terms, increase in insurance premiums due to rising claims or risk assessments, exclusion of certain perils under the policy terms, or occurrence of an uninsured event could expose us to significant financial liabilities. For instance, a major fire in the continuous polymerization plant or damage to captive power generation equipment's could lead to prolonged production halts, inventory losses and repair costs that would need to be borne entirely by us, thereby adversely affecting our operations, cash flows and profitability.

However, we regularly review and assess our insurance requirements in consultation with professional advisors to ensure optimal coverage commensurate with the scale and nature of our risks. We also maintain robust safety protocols, fire-fighting systems, preventive maintenance schedules and employee training programs to minimize the likelihood of insurable events and keep insurance costs under control.

**44. Our growth will depend on our ability to build our brand and failure to do so will negatively impact on our ability to effectively compete in this industry.**

We believe that we need to continue to build our brand, which will be critical for achieving widespread recognition of our products. Promoting and positioning our brand will depend largely on the success of our marketing efforts and our ability to provide high-quality services. The brand promotion activities that we may undertake may not yield increased revenues, and even if they do, any increased revenues may not offset the expenses we incur in building our brand. If we are unable to promote and maintain our brand, our business, financial condition and results of operations could be adversely affected.

**45. Dividend declaration by the Company in the future will depend upon earnings, financial condition, cash flows, working capital requirements, capital expenditure, and restrictive covenants in our financing arrangements.**

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the

declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, the realization of a gain on shareholders' investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value.

**46. Our Promoters will continue to exercise control post completion of the Issue and will have considerable influence over the outcome of matters**

Upon completion of this Issue of upto 16,84,24,218 Equity Shares, our Promoters will continue to own a majority of our Equity Shares i.e. approximately 34.31% of the total post-offer paid up capital. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders' approval. Our Promoters will also be in a position to influence any shareholder action or approval requiring a majority vote, except where they may be required by applicable law to abstain from voting. This control could also delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from obtaining control of our Company even if it is in the best interests of our Company. The interests of our Promoters could conflict with the interests of our other equity shareholders, and the Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

## ISSUE SPECIFIC RISKS

**47. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.**

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

**48. Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.**

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renounees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounee will not be able to apply in this Issue with respect to such Rights Entitlements.

**49. SEBI has recently, by way of circulars dated January 22, 2020, May 6, 2020, January 19, 2021, April 22, 2021, October 01, 2021, and May 19, 2022, streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars and in this Letter of Offer.**

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circulars dated January 22, 2020, May 6, 2020, January 19, 2021, April 22, 2021, October 01, 2021, and May 19, 2022, and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, please refer the section titled '*Terms of the Issue*' on page no. 93.

In accordance with Regulation 77A of the SEBI (ICDR) Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned/reversed/failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

**50. Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholder's approval.**

We propose to utilize the Net Proceeds to repay, in full or in part, identified unsecured loan and long-term working capital requirement. For further details of the proposed objects of the Issue, please refer chapter titled "*Objects of the Issue*" on page no. 61. In case of any exigencies arising out of business conditions, economic conditions, competition, or other factors beyond our control which adversely affect our business, we may require to use the Net Proceeds to meet any other expenditure which cannot be determined with certainty as on the date of the Letter of Offer. In terms of the SEBI (ICDR) Regulations and the Companies Act, 2013, we cannot undertake any variation in the utilization of the Net Proceeds or in the terms of any contract as disclosed in Letter of Offer without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances requiring us to undertake variation in the utilization of the Net Proceeds disclosed in Letter of Offer, we cannot assure that we will be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business. In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Issue, if any, or vary the terms of any contract referred to in the Letter of Offer, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

**51. Our company will not distribute the Letter of Offer, Letter of Offer and application form to certain overseas Shareholders who have not provided an address in India for service of documents.**

Our Company will dispatch the Letter of Offer, Rights Entitlement Letter and Application Form to such Shareholders who have provided an address in India for the service of documents. The Offering Materials will not be distributed to addresses outside India on account of restrictions that apply to the circulation of such materials in various overseas jurisdictions. However, the Companies Act requires companies to serve documents at any address, which may be provided by the members as well as through e-mail. Presently, there is a lack of clarity under the Companies Act, 2013, and the rules thereunder, with respect to the distribution of Offering Materials to retail individual shareholders in overseas jurisdictions where such distribution may be prohibited under applicable laws of such jurisdictions.

**52. Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.**

Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Rights Equity Shares to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation, cash flows or financial condition, or other events affecting the Applicant's decision to invest in the Rights Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the Rights to withdraw their applications in the event of any such occurrence. We cannot assure you that the market

price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price for the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

**53. Any sale of Equity Shares by our Promoters may adversely affect the trading price of the Equity Shares.**

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters will not dispose of, pledge or encumber their Equity Shares in the future.

**54. Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.**

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India. Any gain realized on the sale of listed equity shares on a Stock Exchanges held for more than 12 months will not be subject to capital gains tax in India if STT has been paid on the transaction. STT will be levied on and collected by a domestic Stock Exchanges on which the equity shares are sold. It is pertinent to note that pursuant to the Finance Bill, 2017, it has been proposed, that with effect from April 1, 2017, this exemption would only be available if the original acquisition of equity shares was chargeable to STT. The Central Government is expected to, however notify the transactions which would be exempt from the application of this new amendment. Any gain realized on the sale of equity shares held for more than 12 months, which are sold other than on a recognized Stock Exchanges and on which no STT has been paid, will be subject to long term capital gains tax in India. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to applicable short-term capital gains tax in India. Capital gains arising from the sale of the equity shares will be exempt from taxation in India in cases where the exemption is provided under a treaty between India and the country of which the seller is resident, subject to the availability of certain documents. Generally, Indian tax treaties do not limit India ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares. For more details, please refer to '*Statement of Tax Benefits*' on page no. 72 of this Letter of Offer.

**55. There is no guarantee that our Equity Shares will be listed in a timely manner or at all which may adversely affect the trading price of our Equity Shares.**

In accordance with Indian law and practice, final approval for listing and trading of the Equity Shares will not be granted by the Stock Exchanges until after those Equity Shares have been issued and allotted. Approval will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a failure or delay in listing the Equity Shares on Stock Exchanges. Any failure or delay in obtaining the approval would restrict your ability to dispose of your Equity Shares. Further, historical trading prices, therefore, may not be indicative of the prices at which the Equity Shares will trade in the future which may adversely impact the ability of our shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares at that point of time.

**56. Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.**

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on

such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

**57. In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects / schedule of implementation of this Issue which would in turn affect our revenues and results of operations.**

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the section titled '*Objects of the Issue*' on page no. 61. The proposed schedule of implementation of the objects of the Issue is based on our management's estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

**58. Investors will be subject to market risks until the Issue Shares credited to their demat accounts are listed and permitted to trade.**

Investors can start trading the Issue Shares allotted to them only after they are listed and permitted to trade. Since the Equity Shares are currently traded on the Stock Exchanges, investors will be subject to market risk from the date they pay for the Issue Shares to the date when trading approval is granted for them. Further, we cannot assure you that the Issue Shares allocated to an Investor will be credited to the Investor's demat account or that trading in the Equity Shares will commence in a timely manner.

## **EXTERNAL RISK FACTORS**

**59. Global economic, geopolitical and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.**

Global economic and geopolitical factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

**60. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.**

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

**61. Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.**

Our business and industry are regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the

Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may have to incur costs or may be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

**62. Natural calamities could have a negative impact on the Indian economy and cause the Company's business to suffer.**

Our Country in the past has experienced natural calamities such as earthquakes, tsunami, floods etc. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

**63. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.**

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well as the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect the Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

**64. Taxes and other levies imposed by the Government of India or other State Governments and any other statutory authorities, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.**

Taxes and other levies imposed by the Central or State Governments and any other statutory authorities in India that affect our industry include:

- Custom duties (including anti-dumping duties, etc.) on imports of products
- Goods and Service Tax
- Direct Taxes

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

**65. The outbreak of Novel Coronavirus, or outbreak of any other severe communicable disease could have a potential impact on our business, financial condition and results of operations.**

The outbreak or threat of any severe epidemic, such as the Novel Coronavirus, could negatively impact business sentiment and the overall environment, especially if not adequately controlled. The spread of such diseases may disrupt the operations of our customers and suppliers, adversely affecting our business, financial condition, and results. Measures implemented by authorities including travel restrictions, quarantines, and shutdowns have already affected our workforce, operations, and those of our partners. Significant medical uncertainty persists, and the absence of a certified treatment or vaccine increases the risk of prolonged disruption. A surge in severe cases or premature lifting of restrictions could cause major economic harm in India and globally. Our ability to meet disclosure obligations may also be impacted. Suspected infections among employees could require quarantines or facility disinfection. Overall, epidemics or similar events may adversely affect our revenue and profitability by harming broader economic conditions

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of Novel Coronavirus will cause an economic slowdown and it is possible that it could cause a global recession. The spread of Novel Coronavirus has caused us to modify our business practices

(including employee travel, employee work locations, and cancellation of physical participation in meetings, events, and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed.

The extent to which the Novel Coronavirus further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. We are still assessing our business operations and system supports and the impact Novel Coronavirus may have on our results and financial condition, but there can be no assurance that this analysis will enable us to avoid part or all any impact from the spread of Novel Coronavirus or its consequences, including downturns in business sentiment generally or in our sector. The degree to which Novel Coronavirus impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company.

**66. An outbreak of other infectious or virulent diseases, if uncontrolled, may have an adverse effect on our operations.**

An outbreak of other infectious or virulent diseases, such as severe acute respiratory syndrome, the H1N1 virus, avian influenza (bird flu), the Zika virus or the Ebola virus, if uncontrolled, may have a material adverse effect on the economies of certain countries and our operations. If any of our employees or the employees of our suppliers and/or customers are infected with such diseases or if a significant portion of our workforce refuses to work for fear of contracting an infectious disease, our Company, our suppliers and/or our customers may be required to shut down operations for a period of time, and this could adversely affect our business, results of operations and financial condition.

**67. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.**

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

**68. The extent and reliability of Indian Infrastructure could adversely affect the Company's results of operations and financial condition.**

India's physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt the Company's normal business activity. Any deterioration of India's physical infrastructure would harm the national economy, disrupt the transportation of goods and

supplies, and add costs to doing business in India. These problems could interrupt the Company's business operations, which could have an adverse effect on its results of operations and financial condition.

**69. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.**

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected. Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

## 10. Intention and participation by the Promoters

Our Promoters and members of the Promoter Group have, vide letter dated March 06, 2026, collectively declared and confirmed that they will forgo their entitlement to Equity Shares that may arise from the Issue.

The decision by the Promoters and members of the Promoter Group to forgo their entitlement is being taken to facilitate dilution of promoter shareholding and to enable the Company to meet the Minimum Public Shareholding (MPS) requirements prescribed under applicable law. This step is in accordance with Rule 19A(5) of the Securities Contracts (Regulation) Rules, 1957 ("SCRR"), Regulation 38 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("LODR Regulations"), and the

SEBI master circular No. SEBI/HO/CFD/PoD2/CIR/P/0155 dated November 11, 2024, which allows a listed entity to adopt the Rights Issue route to achieve compliance with MPS requirements.

The Company underwent a Corporate Insolvency Resolution Process under the Insolvency and Bankruptcy Code, 2016. On July 16, 2024, the resolution plan submitted by the Eagle Group was approved by the Hon'ble National Company Law Tribunal, Ahmedabad Bench, with the support of the Committee of Creditors. Pursuant to implementation of the approved Resolution Plan under Section 31 of the Insolvency and Bankruptcy Code, 2016, management and control of the Company were transferred to the Eagle Group with effect from August 05, 2024. As a result of the implementation of the Resolution Plan, the Promoter and Promoter Group shareholding currently stands at 89.83% of the total paid-up equity share capital and the public shareholding has fallen below the SEBI-mandated MPS threshold of 25%. Consequently, the Company has adopted the Rights Issue method for public shareholders and the Promoters and members of the Promoter Group have confirmed that they will not subscribe to their entitlements so as to assist the Company in restoring compliance with MPS norms within the timelines prescribed by the regulations.

In accordance with Regulation 86(1) of the SEBI (Issue of Capital and Disclosure Requirements) Regulations ("ICDR Regulations"), the requirement of minimum subscription shall be applicable to this Rights Issue. If the minimum subscription is not received, the Company shall refund the entire application monies received in accordance with Regulation 86(2) of the ICDR Regulations, forthwith and in any case not later than four (4) days from the date of closure of the Rights Issue.

None of the Promoters, members of the Promoter Group, or Directors has any interest in the objects of the Issue other than to the extent of their respective shareholding in the Company or any benefits arising out of such shareholding.

The Company hereby confirms that it may allot any under-subscribed portion of the Rights Issue to any specific investor(s). The allotment of Equity Shares, if any, in respect of the under-subscribed portion of the Rights Issue shall be made in compliance with the applicable provisions of the SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2018, as amended, and other applicable laws.

## **DETAILS OF THE OBJECTS OF THE ISSUE**

The details of each object of the Issue are outlined below:

### **1. To invest in setting up of Solar Power Plant**

The Company proposes to invest ₹2,200.00 lakhs to set up a new 6.5 MW solar power plant in the State of Gujarat on leasehold land. The Company is entering into the solar power segment with approvals from Gujarat Energy Transmission Corporation Limited and awarded the project on EPC basis to Imperra Energy Pvt. Ltd. There is no assurance that the electricity supplied by these sources will be sufficient, uninterrupted, or available at a reasonable cost in the future. The Company faces risks of power disruptions that could harm its operations, financial condition, and cash flows. This solar project will reduce power costs, minimize dependence on external supplies, enhance energy security, and improve operational efficiency. The solar power project will be developed via an EPC contract and is expected to become operational by the end of FY 2026-27.

#### ***Proposed Location:***

Our Company proposes to set up a solar power project at Village Baiwada, Taluka Deesa, District Banaskantha, Gujarat, admeasuring around 76,298 Sq. Mtrs. The Company has entered into separate registered sub-lease agreements dated February 21, 2025, with Greenpill Renewable Energy Pvt. Ltd. for various parcels of land bearing Survey Nos. 710, 718, 810, 719 and 711 at Village Baiwada. Each sub-lease has been granted for a period of 27 years, commencing from November 25, 2025, and ending on October 24, 2052. The respective landowners have executed lease deeds in favour of Greenpill Renewable Energy Pvt. Ltd., which has, in turn, executed corresponding sub-lease deeds in favour of the Company.

The Board of Directors has reviewed the quotations received from Imperra Energy Pvt. Ltd. (dated 09/02/2026) and J & J Engineers (dated 10/02/2026) from the respective EPC Contractors for the establishment of the ground-mounted solar power plant. The Board has approved the quotation submitted by Imperra Energy Pvt. Ltd. The selected contractor estimates that the erection and commissioning of the

solar plant will take approximately 6–7 months from the date of receipt of the advance payment, as outlined in the approved quotation.

However, we are yet to complete the formalities for appointing the EPC Contractor for the execution of the proposed solar project. The estimated cost of development and execution is based on quotations received from EPC Contractors, which remain subject to change due to various factors. Furthermore, the Board reserves the right to consider and adopt any alternative proposal it deems appropriate. ## 2. Repayment and/or prepayment, in full or part, of all or a portion of certain outstanding borrowings availed by our Company, including the interest accrued thereon

Our Company has entered into various borrowing arrangements from time to time, with banks and financial institutions in the ordinary course of business. The outstanding borrowing arrangements entered into by our Company include debt in the form of, inter alia, working capital term loans. Our Company has, inter alia, availed working capital loans from Axis Bank and HDFC Bank amounting to ₹ 3,000.00 lakhs and ₹ 2,000.00 lakhs, respectively, for funding our working capital requirements and the said loans have been utilised for the same purpose. The aggregate outstanding amount in respect of such borrowings from Axis Bank and HDFC Bank is ₹ 4,800.00 lakhs as on February 20, 2026. Our Company proposes to utilize an estimated amount of ₹ 2,300.00 lakhs from the Net Proceeds towards part or full repayment and/or prepayment of certain borrowings availed by our Company, including a portion of the aforesaid outstanding working capital borrowings from Axis Bank and HDFC Bank. Further, Our Company has obtained a certificate from our Statutory Auditor, M/s. HTKS & Co., confirming the utilization for this purpose bearing UDIN: 26188249LHBQJE6394 and dated May 07, 2026.

Given the nature of these borrowings and the terms of repayment or prepayment, the aggregate outstanding amounts under these borrowings may vary from time to time and our Company may, in accordance with the relevant repayment schedule, repay or refinance some of their existing borrowings prior to Allotment or avail additional credit facilities. Further, the outstanding amounts under these borrowings as well as the sanctioned limits are dependent on several factors and may vary with our business cycle with multiple intermediate repayments, drawdowns and enhancement of sanctioned limits. Accordingly, our Company may utilize the Net Proceeds for part prepayment of any such refinanced facilities or repayment of any additional facilities obtained by our Company. However, the aggregate amount to be utilized from the Net Proceeds towards repayment and/or prepayment, in part or full of such borrowings (including refinanced or additional facilities availed, if any), would not exceed ₹ 2,300.00 lakhs

We believe that such repayment and/or pre-payment will help reduce our consolidated outstanding indebtedness and improve our profits by lowering our debt servicing costs, improve our net debt-to-equity ratio and enable utilization of our accruals for further investment in our business growth and expansion. Additionally, we believe that since our debt-equity ratio will improve, it will enable us to raise further resources at competitive rates in the future to fund potential business development opportunities to grow our business.

The following table provides the details of outstanding borrowings (fund-based) availed by our Company, which may be repaid or prepaid, in full or in part, from the Net Proceeds:

### Breakup of identified borrowings proposed to be repaid:

Note: Above repayment of borrowing based on certificate issued by M/s. HTKS & Co., Chartered Accountants, Statutory Auditor of our Company vide their certificate dated February 27, 2026, bearing UDIN: 26055043RLDKM05850

Our Company has and will consider the following factors for identifying the loans that will be repaid or prepaid out of the Net Proceeds: (i) costs, expenses and charges relating to the facility/ borrowing including interest rates involved; (ii) presence of onerous terms and conditions under the facility; (iii) ease of operation of the facility; (iv) levy of any prepayment penalties and the quantum thereof; (v) terms of prepayment to lenders, if any; (vi) mix of credit facilities provided by lenders; and (vii) other commercial considerations including, among others, the amount of the loan outstanding and the remaining tenor of the loan.

Some of the financing facilities availed by our Company provide for the levy of a prepayment penalty or charge. In the event that there is any prepayment penalties required to be paid under the terms of relevant financing agreement, such prepayment penalties shall be paid by our Company out of the internal accruals of our Company, as applicable. In case we are unable to raise the Net Proceeds till the due date for repayment of any of the above-mentioned portion of the loans, the funds earmarked for such repayment may be utilized for payment of future instalments of the above-mentioned loan or other loans for an amount not more than the total amount and within the deployment schedule mentioned above.

The amounts outstanding under our borrowing facilities may fluctuate from time to time due to various factors, including intermediate repayments and additional drawdowns. Consequently, the outstanding borrowings under such facilities may vary periodically. Our Company may, from time to time, repay, refinance, enter into new financing arrangements, or draw down funds from existing borrowing facilities. In such cases, the Company may utilize a portion of the Net Proceeds from this offering towards the repayment or prepayment of existing or additional indebtedness, as may be determined based on various commercial considerations as set out above.

### 3. To Meet Working Capital Requirements

Our business is highly working-capital intensive due to our integrated manufacturing operations spanning from POY, FDY, texturized yarn, microfilament yarn, cationic and dope-dyed yarn, and textile grade chips, along with our ongoing capacity expansion in the FDY segment. As the Company continues to enhance its production capabilities and procures significant quantities of raw materials such as PTA, MEG, packaging materials, and other inputs essential for continuous polymerization, spinning, and texturizing processes, our working capital requirements have increased substantially. For upcoming financial year i.e. 2026-27, our incremental working capital requirement is estimated at ₹10,000 Lakhs, which will enable us to secure raw material inventories at competitive prices, ensure uninterrupted production across our backward and forward integrated facilities, and meet timely payment commitments to both domestic and international suppliers, thereby optimizing costs and strengthening profitability. We propose to meet this additional working capital requirements from the Net Proceeds of this Issue, with any shortfall being funded through internal accruals as per operational needs.

***Justification for Projected Financial Estimates:***

Our projected financials for FY 2026–27 are based on the stabilization of operations following the successful implementation of the Resolution Plan, anticipated improvement in capacity utilization, and the continued ramp-up of the Fully Drawn Yarn (FDY) segment. Growth is expected to be supported by increasing demand from existing and new customers, a greater focus on higher-margin and value-added products, and the implementation of various operational and cost optimization initiatives. In line with the anticipated scale-up in operations, working capital requirements are expected to remain elevated in FY 2026–27, primarily towards inventories, trade receivables, and operational procurement, to support higher production and sales volumes. The recent increase in raw material prices has further contributed to higher working capital requirements. Overall, we expect substantial growth in revenue from operations in FY 2026–27, necessitating continued investment in inventories, trade receivables, and other operational current assets.

In line with the anticipated growth in business operations, working capital requirements are expected to remain elevated in FY 2026–27. The increase in working capital is primarily attributable to higher levels of inventory and trade receivables required to support increased production volumes and revenue growth. Further, the recent increase in raw material prices has resulted in a corresponding increase in the funding required to maintain adequate inventory levels and ensure uninterrupted manufacturing operations.

The inventory holding period increased during FY 2025–26 as compared to FY 2024–25, primarily due to the planned build-up of raw material and work-in-progress inventories to support expanded production capacities and ensure operational continuity during the ramp-up phase. The increase also reflects the impact of higher raw material prices, which necessitated additional investment in inventory. For FY 2026–27, the inventory holding period is projected to remain in line with the FY2025-26. The inventory levels are expected to remain sufficient to support anticipated business growth and mitigate potential supply chain disruptions.

The trade receivables cycle increased significantly during FY 2025–26 compared to FY 2024–25, primarily due to higher sales volumes and the extension of competitive credit terms to customers in order to strengthen customer relationships, expand market penetration, and support revenue growth during the expansion phase. For FY 2026–27, the receivables cycle is expected to remain broadly stable, with a marginal improvement of approximately 2%–3%, reflecting the continued focus on balancing sales growth with prudent receivables management and collection efficiencies.

We have also reviewed the movement in trade payables across historical and projected periods. Following the implementation of the Resolution Plan and assumption of management control by the new promoters, fresh negotiations were undertaken with vendors and suppliers, particularly key raw material suppliers. As a result, we are able to transition from advance-payment-based procurement arrangements to credit-based procurement for certain critical raw materials. Combined with increased procurement volumes arising from capacity expansion, this led to a substantial increase in the trade payables cycle during FY 2025–26.

For FY 2026–27, the trade payables period is projected to reduce by around 38% compared to FY 2025–26. The projected reduction reflects the strategy of strengthening supplier relationships through timely payments, improving procurement planning, and optimizing working capital management. The proposed utilization of a portion of the issue proceeds towards working capital requirements is expected to enhance liquidity and provide greater flexibility in managing supplier payments. We believe that a shorter payment

cycle will improve its negotiating position with suppliers, facilitate access to more favourable commercial terms, support procurement efficiencies, and potentially result in cost savings across various categories of raw materials and consumables.

Our company will be able to have the disciplined payment practices and reduced dependence on extended supplier credit with the help of utilisation issue proceeds. This gives us better negotiating power and reduce our cost by 3 to 5% in case of Packing Material, Stores, Spares and other additives material.

We believe a portion of the Net Proceeds proposed to be utilized towards working capital requirements may also be deployed for reduction and timely settlement of trade payables. This is expected to strengthen supplier relationships, improve procurement planning and enable us to negotiate better commercial terms and pricing arrangements with suppliers, including availing early payment discounts. We believe that such optimization of supplier payments and procurement terms is expected to result in cost efficiencies, improved realizations and margin expansion, thereby contributing positively to profitability and overall operational performance in the coming financial years

The projected changes in inventory, receivables, and payables are primarily operational and growth-driven in nature and should be viewed in the context of our expanding scale of operations. These movements do not indicate any deterioration in working capital efficiency; rather, they reflect our management's strategy to support higher production volumes, strengthen customer and supplier relationships, ensure uninterrupted availability of critical raw materials, and position the business for sustainable growth.

To achieve the projected growth, we intend to continue implementing various strategic initiatives, including diversification of its supplier base, optimization of existing manufacturing infrastructure, increased focus on value-added products, expansion of the FDY segment, and enhancement of operational efficiencies. In addition, the planned utilization of renewable energy sources for captive consumption is expected to contribute towards lower operating costs and improved profitability. We also remain focused on strengthening its working capital management practices through better inventory planning, disciplined receivables monitoring, and efficient supplier management.

Based on the foregoing factors, management expects FY 2026–27 to witness healthy growth in revenue from operations, supported by volume expansion, improved capacity utilization, a favourable product mix with a higher contribution from value-added products, enhanced realizations, and continued operational efficiencies. The Company also expects to benefit from improved procurement terms, better inventory management, optimization of power and manufacturing costs, and economies of scale arising from higher production volumes. As a result of these initiatives, EBITDA margin is projected to improve significantly over FY 2025–26 levels, reflecting enhanced operating leverage, improved cost efficiencies, and a greater contribution from higher-margin products. Profit after Tax margin is also expected to improve substantially, driven by higher operating profitability, better absorption of fixed costs, and disciplined working capital management. Consequently, the Company expects stronger cash generation, improved return metrics, and enhanced overall financial performance in FY 2026–27.

Our business in the polyester yarn segment is primarily order-driven, supported by repeat customers and consistent demand. The projections are based on historical offtake patterns, prevailing market trends, and anticipated operational improvements. Installed capacity for Partially Oriented Yarn (POY) is expected to remain at 52,500 MT, with production growth of 26%–28% by FY27. In the FDY segment, capacity is proposed to increase from 45,500 MT to 59,500 MT (30%–32% expansion), with production expected to grow by 38%–42%. Polyester Texturized Yarn capacity will remain at 1,500 MT with modest production growth of 10%–14%, while Polyester Chips capacity stays at 24,500 MT with stable production. With post-restructuring stabilization and the FDY expansion, we are confident of significant improvement in turnover, profitability, liquidity, and overall operational performance during the projected period.

**Assumption, holding level and justification for Working Capital:**

Particular	Assumption
<b>Inventory</b>	<p>The inventory holding period, as per the audited consolidated financial statements, stood at 40 days for FY 2024-25 and increased to 46 days in FY 2025-26. This increase primarily reflects the Company's planned build-up of raw material and work-in-process inventory levels to support the expansion of production capacity, including the commissioning and ramp-up of additional FDY lines, as well as the impact of higher raw material prices. The Company continues to maintain adequate inventory levels of critical inputs such as PTA, MEG, polymer chips, and packaging materials to ensure uninterrupted operations across its polymerization, spinning, and texturizing units. For FY 2026-27, the inventory holding period is projected to moderate to approximately 43 days. The expected reduction is attributable to the stabilisation of expanded operations and continued optimisation of inventory management practices. The Company intends to maintain optimum inventory levels to support anticipated growth in the synthetic yarn segment, ensure operational continuity, and mitigate potential supply-chain disruptions through timely availability of critical raw materials. Further, the increase in raw material prices has elevated the Company's working capital requirements, as additional funds are required to procure and maintain adequate inventory levels necessary for uninterrupted manufacturing operations and timely execution of customer orders. In view of the increased scale of operations and recurring order flows from customers, maintaining optimum inventory levels remains essential for efficiently supporting enhanced operational activities.</p>
<b>Trade Receivables</b>	<p>The trade receivables period, as per the audited consolidated financial statements, stood at 31 days in FY 2024-25 and increased to 46 days in FY 2025-26. This increase is primarily attributable to the Company's strategy of offering competitive and flexible credit terms to customers in the textile industry to support higher sales volumes, particularly in POY, FDY, and value-added yarn products, coupled with significant growth in revenue during the year. Such credit policies are intended to strengthen long-term customer relationships, enhance market penetration across key product segments, and support revenue growth during the expansion and ramp-up phase of additional production capacities, while continuing to maintain prudent credit risk management practices. For FY 2026-27, the trade receivables period is projected to remain broadly stable at approximately 47 days. The Company expects to continue supporting customer growth through competitive credit terms while focusing on strengthening collection mechanisms, monitoring customer credit profiles, and improving receivables management processes. The projected receivables cycle reflects management's balanced approach towards sustaining revenue growth while maintaining adequate control over working capital requirements.</p>
<b>Trade Payables</b>	<p>The trade payables period, as per the audited consolidated financial statements, stood at 51 days in FY 2024-25 and increased to 56 days in FY 2025-26. Until March 2024, the Company was under the management of the Resolution Professional during the CIRP process under the Insolvency and Bankruptcy Code, 2016. Following the approval of the Resolution Plan by the National Company Law Tribunal on 16 July 2024 and its subsequent implementation, the new management formally assumed control and initiated fresh negotiations with vendors and suppliers, including key raw material providers.</p> <p>The trade payables period, as per the latest audited consolidated financial statements for FY 2024-25, stood at 51 days. For FY 2025-26, the trade payables period is expected to remain at 56 days and is projected to further normalise to around 41 days in FY 2026-27. Until March 2024, the Company was under the management of the Resolution Professional during the CIRP period under the IBC. Following the approval of the new management's Resolution Plan by the National Company Law Tribunal on July 16, 2024, the plan was implemented in FY 2024-25. The new management formally assumed control upon completion of the conditions stipulated under the approved Resolution Plan.</p> <p>Under the revised commercial arrangements, the Company began receiving critical raw materials such as PTA and MEG on extended credit terms, whereas previously such materials were largely procured against advance payments. This transition, coupled with higher procurement volumes associated with capacity expansion and increased operational scale, contributed to the increase in the trade payables cycle during FY 2025-26.</p>

For FY 2026-27, the trade payables period is projected to reduce to approximately 41 days. The reduction is expected to be supported by improved liquidity, effective utilisation of internal accruals, and the proposed deployment of rights issue proceeds towards working capital optimisation. The shorter payment cycle aligns with the Company's objective of strengthening supplier relationships, securing more favourable commercial terms, obtaining competitive pricing and cash discounts, and ensuring priority allocation of essential raw materials. The projected reduction in trade payables reflects the Company's strategy of rationalising payment cycles and reducing reliance on extended supplier credit while maintaining uninterrupted procurement of critical inputs. The expected benefits of timely supplier payments, including improved procurement efficiencies, enhanced negotiation leverage, and stronger long-term supplier relationships, are anticipated to contribute positively towards cost management, operational continuity, and profitability.

## RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

There are two routes through which foreign investors may invest in India. One is the “*automatic route*”, where no government approval is required under Indian foreign exchange laws to make an investment as long as it is within prescribed thresholds for the relevant sector. The other route is the “*government route*”, where an approval is required under foreign exchange laws from the relevant industry regulator, prior to the investment.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise way such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the consolidated FDI Policy Circular of 2020 (***‘FDI Circular 2020’***), which, with effect from October 15, 2020, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2020 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict, the relevant notification under Foreign Exchange Management (Non-Debt Instruments) Rules, 2019 will prevail. The payment of inward remittance and reporting requirements are stipulated under the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 issued by RBI. The FDI Circular 2020, issued by the DPIIT, consolidates the policy framework in place as on October 15, 2020, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on October 15, 2020.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of RBI, provided that:

1. The activities of the investee company fall under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI (SAST) Regulations;
2. The non- resident shareholding is within the sectoral limits under the FDI Policy; and
3. The pricing is in accordance with the guidelines prescribed by SEBI and RBI.

No investment under the FDI route (i.e., any investment which would result in the investor holding 10% or more of the fully diluted paid-up equity share capital of the Company or any FDI investment for which an approval from the government was taken in the past) will be allowed in the Issue unless such application is accompanied with necessary approval or covered under a pre-existing approval from the government. It will be the sole responsibility of the investors to ensure that the necessary approval or the pre-existing approval from the government is valid to make any investment in the Issue.

Our Company will not be responsible for any allotments made by relying on such approvals. Please also note that pursuant to Circular no. 14 dated September 16, 2003, issued by RBI, Overseas Corporate Bodies have been derecognized as an eligible class of investors and RBI has subsequently issued the Foreign Exchange Management (Withdrawal of General Permission to Overseas Corporate Bodies (OCBs)) Regulations, 2003. Any Investor being an OCB is required not to be under the adverse notice of RBI and in order to apply for this issue as an incorporated non-resident must do so in accordance with the FDI Circular 2020 and Foreign

Exchange Management (Non-Debt Instrument) Rules, 2019. Further, while investing in the Issue, the Investors are deemed to have obtained the necessary approvals, as required, under applicable laws and the obligation to obtain such approvals shall be upon the Investors. Our Company shall not be under an obligation to obtain any approval under any of the applicable laws on behalf of the Investors and shall not be liable in case of failure on part of the Investors to obtain such approvals.

The above information is given for the benefit of the Applicants / Investors. Our Company is not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of the Letter of Offer. Investors are advised to make their independent investigations and ensure that the number of Equity Shares applied for do not exceed the applicable limits under laws or regulations.
